District Administrator Evaluation

As a regular and scheduled activity, the Board will evaluate the performance of the district administrator. The evaluation shall be based upon written job description and responsibilities of the position. Its primary purpose is to effect improvements in administrative leadership.

The evaluation shall be a composite of the individual Board members opinions, however, the Board as a whole will meet with the district administrator to discuss the evaluation. The evaluation will include a discussion of the district administrator's strengths as well as weaknesses. The Board should not limit itself to the items that appear on the evaluation form. No form or set of guidelines can encompass the totality of the district administrators responsibilities.

The district administrator shall also have an opportunity to evaluate the Board. Ideally, the evaluation will include an examination of the working relationship between the Board and the district administrator.
