School Safety Plan

South Shore School District is committed to providing a safe and healthy environment as reasonably possible for students, employees and citizens while they are present on school premises or participating in school-sponsored activities. With this goal in mind, a school safety plan will be implemented and updated regularly.

The school safety plan will be implemented and updated with involvement from Board members, administrators, staff, law enforcement and other community agencies, students, parents and other interested parties as deemed appropriate and necessary.

The school safety plan shall be consistent with District policies and legal requirements, and shall include the following:

- measure to prevent unsafe conditions, disruptions and violence;
- intervention strategies to help maintain a safe environment, keep problems isolated and deter them from recurring; and
- a crisis response plan.

A current copy of the school safety plan shall be filed in the District and Jr-Sr High School offices. District employees shall receive a copy of the school safety plan. Staff in-service training may also be provided for issues related to the school safety plan.

The district administrator or designee shall provide regular reports to the Board regarding the school safety plan, needs and issues. Students, staff, parents and the public should be made aware of school safety efforts being taken in the District so as to enhance their confidence in the safety of the schools.
