Buildings and Grounds Management

It shall be the policy of the South Shore Board of Education to maintain school properties in good physical condition and to provide new facilities when deemed necessary. School properties shall be safe, clean, sanitary and as comfortable and convenient as the facilities will permit or the use requires.

To maintain the buildings, grounds, playfields and equipment at an acceptable standard and to meet the needs of the educational program, it is necessary to use the services and skill of many trained persons. The district, therefore, shall be properly staffed and equipped to perform all normal building and grounds maintenance, repair and improvement functions.

Within each individual school, the principal shall be responsible for the care and upkeep of the building and for the supervision of the school custodial staff.
