Diseases

Diseases come in many different forms, but they all cause You health problems. Many of them like Cancer invade your body, grow, and expand locally by invasion and systemic metastasis.

In simple terms it's healthy cells that for various reasons have gone bad.

If you are afflicted or know someone who is afflicted with a debilitating disease, then you know the pain and anguish this causes. You also know that the months following are extremely stressful due to the various treatments required.

The medical system has a one track mind, and you might be reminded that even some Doctors have refused treatments that they have recommended to their patients. This should tell you something right there. If you are looking for alternative treatments, you must read the following pages.

This is not some scam or placebo, this has been used and is being used by alternative doctors successfully for the treatment of Cancer and other immune diseases.

Due to the laws we can't use the word "Cure", but we can say alternative, and natural is always the first choice. In this case the information you are about to read will provide you with what it is, how it works, history, cautions (minor) and reliable places to buy from.

In this report we have done the grunt work of researching and bringing the information to you. You should read it, understand it and then consult with your doctor before you continue.

Lets bottom line this one more time. If you believe the medical system is the beginning and the end, don't purchase this report. If you believe that your body is an amazing self-healing creation, give it what it needs to heal then you need to read on.

Here is a list of the various types of Cancer.

- bladder cancer
- breast cancer
- carcinoid tumor
- colorectal cancer
- glioblastoma
- liver cancer
- melanoma
- multiple myeloma
- neuroblastoma
- ovarian cancer
- pancreatic cancer
- prostate cancer

We mention a few forms of Cancer because Cancer (**or the mutation of destructive cells**) has a far reaching scope in your body.

Here is one fact commonly know. Cancer and other diseases cannot survive in a alkaline system, unfortunately our diets consist mostly of acidic foods. Many diseases thrive when your body is acidic.

Cancer tops the list, but don't minimize the affect other diseases have because the don't kill you. Anyone having one of the sub categorized diseases has just as much pain and suffering as another.

There is Hope, there are Alternatives as you will read.

Other Autoimmune Disease

- multiple sclerosis
- systemic lupus erythematosus (SLE/LED)
- rheumatoid arthritis
- sarcoidosis
- scleroderma
- Crohn's disease
- ulcerative colitis
- celiac disease
- psoriasis and psoriatic arthritis

The word **Autoimmune** is used at this point because the origin of many diseases is believed to be a product of a weak immune system.

Another word we need to know is **Endorphins**, often associated with the feeling we get from exercise. Beta endorphin and met-enkephalin, another opioid peptide produced by the body have profound effects on the immune system.

It is suggested that the increased endorphin and enkephalin levels, work directly on the tumors' opioid receptors — and, perhaps, induce cancer cell death (apoptosis). In addition, it is believed that they act to increase natural killer cells and other healthy immune defenses.

Now you can see that research shows the body has natural killer cells that protect you. The point you want to get from all this is the body doesn't need chemotherapy, radiation, or other therapies killing both good and bad cells, the body needs help to do it naturally.

You don't have to guess too hard why drug companies, and the medical system doesn't want you to discover alternative solutions, it's MONEY. Your pain and suffering traded for PROFITS.

They have spent multi-millions of dollars convincing you that drugs are the answer, that they are the only option, and you really don't have any choices. Well, right here in this report that is proven wrong, and the studies verify it.

Ask the people who have been helped, who didn't have to go through the painful therapy offered to them from the medical system. I know it's a matter of liability, the insurance won't cover this or that. The malpractice insurance, the HMOs, they all play a part. You end up caught in the middle, you have become another file among the thousands already there.

I have been there too.

The good news is, you now have a Choice

The following report has information that tens of thousands of people are using **Right Now!**
