

1 Curriculum Vitae. Igor Stepanovich Makarov (b. 18.08.1935, Moscow)

Curriculum Vitae (1953-2019)

Igor Stepanovich Makarov

(b. 18.08.1935, Moscow)

1953-1958 Student of the Moscow Institute of Communications. Graduation with honor. In 1957 I marry to a student of the same institute; however in 1961 my wife, Jana Makarova, dies after a long disease.

1958-1960 Engineer at the Research Department of the above Institute (the Chair of Magnetic Recording).

1961-1964 Post-graduate student of the above Institute. I defend the dissertation, "*Investigation of the Methods of Efficient Digital Magnetic Recording*", and is conferred the degree of The Candidate of Engineering Sciences (approximately equivalent to the PhD in Technology).

1964-1976 Senior Researcher at the Research Institute of Radio (Moscow). I am engaged in R&D of digital relay systems. I develop two projects of highly efficient systems but, because of a kind of mismanagement on the part of the administration and the lack of resources, I am deprived of conditions to complete the projects and eventually leave the research department. In 1964 I marry for the second time, but the marriage proves unsuccessful and in three years we divorce leaving a daughter, Olga Makarova (b.1966).

1976-1984 Leading Engineer at the Department of Scientific and Engineering Information of the above Institute.

1984-1992 Engineer. Miscellaneous firms dealing with electronics. In July 1992 I immigrate in Israel. I have got over fifteen works published in scientific journals and one invention.

My Independent

Research in Physics and Humanities

1968-2005 Late in the 60s, independently of my official work, I started my own research in Systems Theory which gradually involved Theoretical Physics and Philosophy and eventually yielded results of fundamental significance for physics.

1996-2006 I travel across Europe (Britain, France, Germany, Austria, Bulgaria), live for two years in Canada, proceeding whenever possible with my research and eventually returning to Israel, with my research significantly developed. I manage to publish several parts of the research in the *Indian Journal of Theoretical Physics* (1996-2005, Calcutta).

2006 - August 2007 I live for a year in Britain (Greater Manchester). In July 2007 I print and bind with my own hands two books with my research in physics, "*A Theory of Ether Generating Matter*" and "*A Theory of Ether, Particles and Atoms*", and donate them to academies and libraries of some Western countries. In August 2007 I return to Israel.

August 2007-2009 The Ministry of Immigration provide me with a social accommodation in a hostel (51 Hativat Carmeli, Haifa 32629, Israel) with a special regime formally prohibiting any activity except 'simple living' and not guaranteeing common security – actually a concentration camp controlled thoroughly by Russian agents, the only place really available for me in Israel. I register my above research at the Copyright Office. In March 2009 I print privately a hundred copies of the second, corrected edition of the second of the above mentioned books. In November 2009 I visit Amsterdam and distribute dozens of the book copies to universities and institutions the

2 Curriculum Vitae. Igor Stepanovich Makarov (b. 18.08.1935, Moscow)

world over, on top of the electronic version of the book sent to them earlier.

2010-2012 I correct the second edition of the book. I set up my own website, *The Reform Science Center*, <http://www.reformscience.org>, with an *Archive* at <http://www.keepandshare.com>, and publish my research online. I write three articles, “*Reforming Modern Science by Metascience*”, “*The Logical Framework of Economics*” and “*The Science of Politics*”, and publish them online. I write a small book, “*Reform of Modern Science. Politics. Economics*”, which gives the true interpretation of the General Systems Theory; I publish it online and with the Amazon company. All my efforts are now directed towards turning my above virtual organization into an international NGO aimed at reforming modern science on a broad scale; but my real living conditions seem to have made those efforts futile.

2013 I make a trip to Berlin trying to get support to my scientific activities from some left organizations and institutions but so far without any effect.

2014 I complete a small textbook for universities, titled “*Introduction to Theoretical Astrophysics*”, and publish it online and with the Amazon company.

2015 July I visit Zurich (the Hotel X-Tra) to open possibly a bank account there, but with no effect. Then I fly to Brussels (the Bedford Hotel & Congress Centre, 25-29.07.15) in attempt to visit the Science Europe Foundation Office and get support for my mission, but with no effect again. On July 31 I return to Tel Aviv, my suitcase lost, then found and delivered to me on August 31.

2015 October I visit Zurich again (the Hotel Senator, 26.10.15-11.11.15). I make proposals of cooperation to the UZH and ETH Zurich universities, but with no effect. I donate my three books to the library of the ETH Zurich. I explain all my above failures by the conspiracy against me initiated by Russian agents and supported by their counterparts in Israel and some European countries.

2015 November For three days (November 11-14) I stay in Paris (the Hotel des Arenas) in attempt to visit UNESCO and get support for my mission, but there is an international conference and I am able only to hand my three books to the UNESCO librarian. Then I send the same books also to the British Library (13.11.15). On November 14, the day of terror attacks in Paris, panic and flights delay, I lose my laptop at the CDG-1 airport. Unaware of that for some time, I return to Zurich and stay there until 18.11.15 waiting for the plane. Then I return to Tel Aviv and apply to Paris for my laptop which is soon found. I make the contract with the Baggage Du Monde company and pay 150 euro for the delivery of my computer to me in Israel. However, the UPS company, controlled in Israel by Russian agents, gets to know my problem, easily intercepts the delivery and, under a false pretense, refuses to complete it. In some days the computer disappears and the UPS refuses to respond to my alarm calls. Thus the UPS company has actually stolen my computer with all the materials of my almost 40-year-long research. I apply for help to the Security, the Police in Haifa, Prime Minister of Israel, the Knesset, the Supreme Court of Justice, even to the UN, but in vain. The schedule of the delivery can still be seen on the website: <http://www.ups.com>, its tracking number: 1ZV198V60498357324.

2016 I apply for participation to some international conferences in physics in Europe and the USA. Meanwhile I write some articles and comments in politics and publish them online.

2017 June 18 I take a trip to Stockholm to discuss the rejection of my participation at the July Cosmology conference at the Nordita Institute. After the failure with the conference, I nevertheless apply for asylum in Sweden, just to have more time to make contacts with scientific, political and social organizations in Sweden and beyond and thus gain possibly support for my mission. However, August 10-15, I am sent by the migration service to the South and finally placed in a

3 Curriculum Vitae. Igor Stepanovich Makarov (b. 18.08.1935, Moscow)

special hotel near Goteborg, with a good food service but absolutely with no prospect for my life in Sweden, to say nothing of my mission.

In Goteborg, I try to make contacts with the Goteborg University, the City Hall and the local Culture Center, but all in vain. On top of that, September 25, the Hapoalim Bank in Israel blocks my Master debit card leaving me only with a little amount of money in my asylum card. Trying desperately to get some progress, I apply to the Swedish Migration Court, October 18: <http://kvisit.com/Sz5f1Aw>, but also in vain.

Having received a suspicious letter from a local police station, November 9, I take some of my things, get on the train and, with some coins in my pocket, bread and cheese, thanks to a kind nature of the train team, return to Stockholm. The same day I appeal for help to the Migration agency but they end my asylum procedure and deny me any help. I spend the night in the street and November 10 (Thursday) apply for help to the Israel Embassy but in vain as well. To survive that night, I walk across the city to find the ambiguous social service. With some help from pedestrians, I find the service and, after some negotiation, they let me spend the night in some good room. In the morning a social worker brings me a cup of tea and sends me to a hotel in the city, where I stay for five days, contact the Border Police and, with their good help, personally with the help of Mr. Stephan Knopf's, November 17, I return to Israel.

It is necessary to add that a social police officer detected my phone number, that I had used for five months in Sweden, to be wrong. I think it would have been absolutely impossible for me to make such a mistake: I was provided perhaps with a specially prepared false SIM-card or it was perhaps secretly modified remotely. Indeed, I suspected some defect in my phone before and when once I tested it with the help of a security officer, it worked well. So that was one of the numerous tricks by the local Swedish security.

Analyzing my past and present experience concerning my efforts to get my research works recognized officially and to get support to my current mission, I cannot help but conclude that, most likely, Russian security agents have contracted a conspiracy against me with their counterparts in Europe and Israel, capitalizing on the present ideological crisis and the corruption of scientific institutions, after which all my efforts in Europe and Israel became doomed.

2018 May-June . On May 27, I visited Athens to take part in the ATINER International Conference in Philosophy (Hotel Titania). On May 28, at about 12:00 (Session V) I made a report (20 min), titled "Reform Science: Its Logic and Structure", with slides. There was no much discussion. The audience was 15-20 persons. The abstract of my report can be seen in the ATINER Book of Abstracts (Philosophy 2018) online: www.atiner.gr/philosophy; 2018, page 33. The respective article with the same title, was submitted to the conference on May 25: <http://kvisit.com/SuND1Aw>. On May 29, 9:30, I visited Dr. Gregory Papanikos, President of the ATINER, at his Office, Valoritou 8, and debated with him the prospect of cooperation in the wake of my research and my mission. He promised to send me his decision in a month. It was only on May 30 at the airport on the way back to Israel did I find my documents and money (my Passport, Immigration Passport, old Passport, and about 150 Euro) having been stolen, supposedly at the above conference hotel. With the help of the Border Police I received an official document confirming that fact and managed to return to Israel. On May 31, I visited the Ministry of Immigration and the Ministry of Internal Affairs of Israel to restore my above documents. On July 3, I received new, now biometric, documents (Passport and ID card) of a very poor quality and with my deliberately distorted signature. The same month, for that deliberate distortion of my documents, I appealed to the Supreme Court of Justice of Israel but in vain.

June 2, 2018, I sent a letter to the UN Security Council proposing an international conference to

change the present organization of global management with a new order suggested by my research, <http://kvisit.com/S9tX1Aw>.

2019. My proposals to present orally my revolutionary research in physics at the conferences ICNFP-19 in Greece and NPA-19 in Germany were rejected, traditionally without any argument.

2020, January-April.

A strange leap-year. A number of easy-available, suspicious conferences in physics in Europe and world over without some traditional issues: time-slots, publications, international advisers, deadlines for submission, etc., sponsored by Physics Journals, not a single university. I have submitted my abstracts to some of them but the Corona-virus confused all plans.

At the same time, situation at my hostel, 512/51 Hativat Carmeli Street, 32629 Haifa, Israel, is growing sinister: local people control all my banks and threaten to deprive me of everything. There is no government in the country which to apply for help. No reliable email channel. No comments in the Youtube.com. No responses to my numeral letters to Ukraine and other countries, including UN, UNESCO, ICTP. Everything is intercepted by local Russian fascists.

I wrote some remarks on the Covid-19 to estimate the Corona-virus as a socially useful event. Passover gifts by volunteers. I was invited to submit my abstract for an EPSA political conference in Prague, June 2020, but in two months my abstract, concerning political science and international relations, was rejected without explanation. I suspect interference by Russian fascists.

I wrote a political proposal to Rinat Akhmetov to improve situation in Ukraine and then in Russia, but there has been no response.

My latest experience and conclusions

With my latest quarter-of-century experience, I may conclude that these two mafia-fascist countries, Russia and Israel, seem to present the main threat to civilization. For over 27 years, since my immigration in Israel, July 1992, they have kept me in a thorough communication isolation, preventing me from getting any live contacts and discussions concerning my scientific works. When I happened to go abroad, the Russian and Israel security dragged the local counterparts into their conspiracy against me. They spied my computers, stole and spoiled my electronics, blocking all channels of communications. Whenever possible, they tried to undermine my living conditions, stealing my documents, interfering into my banks, financial and credit cards operations and fabricating false documents. They tried to falsify my photo and my signature. I suspect that my current Israel bio-documents, the ID-certificate and the Passport, have falsified my fingerprints. There is no such concept as Justice in Israel at all. There is no Court in Israel deserving its name. There are only Jewish mafia laws here.

Now that my works, published online, have convinced the world scientific community of their vital importance for the destiny of civilization, the destiny of Russia, Ukraine and Israel, in particular, the Russian security-intelligence gang in Israel seems to have started planning resolute measures against me. Indeed, after they had sabotaged my five-month-long efforts in Sweden to get support for my mission, May-October 2017, they undertook the following operations against me:

- during my participation at the ATINER philosophy conference in Athen, 27-30 May 2018, they managed to steal my Israel Passport along with some other documents and the money I had; when I nevertheless returned to Israel and applied to restore my stolen passport, the Israel Ministry of Interior in Haifa gave me a Bio-Passport with a falsified copy of my signature and a Bio-ID certificate with an unacceptable quality; I applied to the Israel Supreme Court of Justice on the deliberate fabrication of my Israel documents but in vain;
- in April 2020, one of the above stolen documents was returned to me, but not the passport; so the gang plans perhaps to use my former Israel passport in their future operations with some my double;
- recently, when the gang prevented me from purchasing some Oxford University online service, I

had to cancel my compromised international debit VISA card and ordered a new one, but so far they have prevented me from receiving it; so that fascist gang has been treating me like a prisoner in Israel; no wonder that my recent application to the Israel Academy of Sciences and Humanities (http://kvisit.com/SuL_3Aw) has not been responded yet; there is a strong doubt it will be responded at all, because that would be dangerous for this ultra-nationalistic ghetto state.
