

## People Against Childhood Cancer

An on-line network of parents, family, community members, medical professionals, and representatives from Childhood Cancer organizations such as **CureSearch, Alex's Lemonade Stand, St. Baldricks, Rock Against Cancer and the Rally Foundation for Childhood Cancer Research.**

We have all joined together as...

***'One voice united against childhood cancer'***

- ⇒ **Childhood cancer is the #1 killer disease of our children**, more than from asthma, diabetes, cystic fibrosis, congenital anomalies, and pediatric AIDS combined!
- ⇒ **1 in 330 children will be diagnosed with cancer** before age 20, **46 every school day!**
- ⇒ **Each year 3,000 children die**, and 35-40,000 are in treatment.
- ⇒ The National Cancer Institute's (NCI) federal budget was \$4.6 billion. **All 12 major groups of pediatric cancers combined received less than 3% of those funds!**

Since August 2008 PAC2 has expanded into a nationwide community of over 3,700 members. We unite on Initiatives where members advocate for awareness and funding. Members create their own pages and blog, post photos and video. The PAC2 forum provides a means to spread news, knowledge, debate and support. Over 75 childhood cancer organizations with PAC2 rep's post fundraisers.

**It's like an online childhood cancer newspaper....**that you can help write! We also have the largest collection of childhood cancer stories ever tabulated within the Petition to Raise Awareness and Funding for Childhood Cancer.

**Future success is ultimately dependent upon you.** We need your voice to help make a difference in the lives of America's children.
