

Tiddly Winks

Objective: To practice the concepts largest, smallest, little, big, center, over, farthest, closest, center, and edge.

Materials: Tiddly Winks disks; the shooter disk and 3 smaller ones for each table group. Some games include a molded dish with target areas. You may also use small saucers or custard dishes to provide target areas. A felt square is used as a shooting surface.

Directions: The object is to press the larger shooter disk on the edge of the smaller disks while on top of the felt piece making the smaller disk pop up. The students get three shots to try and get the 3 smaller disks into the molded scoring dish or custard dishes. The concept words are used to describe what is happening with the disks during the game. Younger students may need some instruction and practice shots before starting.
