This is a fairly complete list (excluding export models). Generally, Dodge provided completely separate parts manuals between the Power-Wagons and 2-wheel-drive trucks for the years 1945-1957. This is especially true of the bound manuals. Note that starting in 1957, all trucks were included together. All of the manuals up through 1957, list on their cover, the previous manual number that they supersede. Special thanks to Eric Bannerman for supplying part numbers and descriptions for the following manuals: 1957-58 K&L Series, WM4399, D-16889, 81-690-007, 81-690-0072, and 81-690-0403.

Some of the loose leaf binder manuals contain a separate section devoted exclusively to the Power-Wagon. The separate Power-Wagon section would be identical to the bound Power-Wagon specific versions. — Clint Dixon ©2004-2012
