

Fenix™ E21

Fenix E21 is an exquisitely-made portable outdoor flashlight which is easy to use with its simple operation. E21 uses high brightness LED with high efficiency reflector to deliver an outstanding balance between flood beam and focus beam. It offers two types of outputs by pressing the tactical push-button tail cap switch which can meet various lighting demands. The design of 2AA batteries power case and high efficiency circuit provide E21 a long runtime. With E21, it will simplify and smooth your fascinating adventures, such as touring, hiking, camping, mountaineering, etc. Technical Parameters

ANSI/FSC	Mode A	Mode B
 OUTPUT	48 LUMENS	150 LUMENS
 RUNTIME	11 h	2 h15 min
 DISTANCE	134 m	
 INTENSITY	4510 cd	
 IMPACT RESISTANCE	1.5 m	
 WATERPROOF	IPX-8, underwater 2 m	
EXTRA FUNCTION		
ACCESSORIES	Lanyard, two spare o-rings, and a spare rubber switch boot	

- Cree XP-E LED with a lifespan of 50,000 hours
- Uses two 1.5V AA (Ni-MH , Alkaline) batteries
- 164mm (Length) x 25.4mm (Diameter)
- 90-gram weight (excluding batteries)

- Digitally regulated output - maintains constant brightness
- Patented physical structure avoids circuit damaging from reverse connection of battery
- Tactical push-button tail cap switch
- Made of durable aircraft-grade aluminum
- Premium Type III hard-anodized anti-abrasive finish
- Toughened ultra-clear double glass lens with anti-reflective coating

Notice: The above-mentioned parameters (tested by 2500mAh Ni-MH battery in Lab) are approximate and may vary between flashlights, batteries, and environments.

Operation Instruction

Flashlight turning on/off: Depress the pushbutton switch to momentarily activate the light. Depress the push button completely to turn on the flashlight and lock it, Depress the push button again to turn off the flashlight.

Output Selecting: Screw the flashlight head clockwise to tighten it for output B, unscrew the flashlight head half a turn counterclockwise for output A

Battery Replacement

Unscrew the tail cap to insert the batteries with the anode side (+) toward the lights head, screw the tail cap back on to test.

Usage and Maintenance

- Please don't disassemble the sealed head, doing so can cause damage to the flashlight and will void the warranty.
- High-power flashlight should use battery with high current discharge capability, we suggest using high performance Ni-MH rechargeable battery, using alkaline battery will decrease the runtime of this high intensity flashlight.
- Please use battery of high quality, and take out the battery if you do not use the flashlight for a long time, or the flashlight could be damaged by electrolyte leakage or battery explosion which is caused by low quality battery.
- Please replace the O-ring if it is damaged after using for a long time. Doing so will keep the flashlight properly sealed against water.
- Please clean the contacts of your light from time to time, especially if the light flickers or doesn't light up. There may be several reasons for a flickering or not working light:

Reason A: The batteries need replacing.

Solution: Replace batteries (Please confirm the correct installation of anode and cathode).

Reason B: The threads PCB board contact or other contacts are dirty.

Solution: Clean the contact points with an alcohol soaked cotton swab.

If the above methods don't work, please contact your distributor and refer to the warranty policy.

Notice: The routine cleaning video can be watched and downloaded through Fenix official website, please log onto the service channel->"maintenance for light"

Product Warranty

We will replace products afflicted with manufacturing defects within 15 days of purchase and

repair a light free of charge within 24 months of purchase if problems develop with normal use; if repair is required after 24 months from the date of purchase, we will charge for parts. The total repair fee is dictated by the cost of the replaced materials.

Warranty Card Registration

We kindly suggest that you register your guarantee card on the official website for Fenixlight Limited. You can get an extra six-month warranty period once you have successfully registered. What's more, you could take part in the lottery of questionnaire at the same time.

Warning

- E21 is a high intensity lighting device and capable of causing eye damage, avoid shining the light directly into the eyes.
- Avoid the use of 14500 rechargeable Li-ion battery, or damage will be caused to the light circuit.
