

THE 90° RULE LOOZERZ

POT RED

Here the *q*ball iz dead in line with the ryht top pocket --- a pot red iz eezy, running throo to good pozzy, perhaps another pot red.

LOOZERZ

But i play the just-az-eezy loozer, az shown. The red stops near the Magik Circle --- now i kan play my favorit middle pocket loozerz --- untill i reech the limit (15 hazardz).

QBALL

Az uzual, with the red sitting on the center spot, u kan hav the *q*ball sitting anywhere in a large zone (not shown) & still play for the same kontakt on red. But the skrew will depend on the range, & u will need to judge the strength of the shot to acheev the dezired red pozzy.

KOMPARE

Put the *q*ball on the baulk line, dead in line with the left top pocket, az shown. How many points do u get by playing a skrewy loozer for yor first shot, kompared to the pot red.

BAULK POCKET

The same sort of thinking applyz if the *q*ball iz sitting for a pot into a baulk pocket. Instead of potting & skrewing back, we play loozerz.
