

THE 90° RULE SKREW LOOZERZ

KANNON

Here we were playing floating-yellow & lost good pozzy --- so we elekted to play a kannon to leev the pozzy shown here.

LOOZER

Now we hav a simple loozer (az shown), to leev the red over the middle pocket.

SKREW

I uzually play theze baby loozerz with extra skrew & extra punch --- otherwise u tend to hit too slow & hencely underskrew the loozer.

QBALL

Az uzual, u kan place the qball anywhere in a large zone (not shown) & still play for the same kontakt on red etc, albeit thinner or thicker --- but u will need to judge the strength of the shot to acheev the dezired red pozzy.

DOUBLE

If the red were kloser to the kushion, the red would naturally want to stop near the centerline of the table, or even nearer the other pocket.
