

INDIREKT DROP CANNONS DANGER ZONE

BAD LUCK When playing indirekt drop cannons the yellow kan kiss the qball before the qball reeches the red. The pix shows **6 YELLOWS** where u kan eezly get a robbing-kiss, especially if u kontakt the yellow too thick. The **4 WHITE** qballs show where kisses often occur.

THE nearest yellow would uzually be played halfball with no side. Best play thin halfball with a bit of running from the extremity of the Dee.

THE next 4 yellows would uzually be played with more and more running, and thicker and thicker, from the extremity of the Dee. Best spot allmost 2 balls wider (west), & uze even more running, & a little thinner.

THE furtherest yellow. Best spot at the extremity of the Dee, uze super-running, hit harder, & keep your fingers krossed. If u avoid the robbing-kiss u will hit the red hard, so dont expekt a perfikt leev. Why not hav a look at the alternativ red-cush-yellow cannon.

SOMETIMES the yellow threatens a robbing-kiss, but iz too late or stops short.

ANYHOW for some of theze, the yellow will go below the Spot, but this iz ok. Hitting very thick to try to take the yellow abov the Spot iz suicide — it karnt be dunn, u will uzually miss the cannon, & u still tempt a robbing-kiss.
