

INDIREKT DROP CANNONS

X-OVER V-LINE

V-LINE The pix shows a Green & Brown & Yellow & 7 Reds placed to make a V-shaped line. If in a game a yellow iz on this V-line then an indirekt halfball drop cannon from inhand will double the yellow direktly to the Spot.

KIECKHEFERS The 13 blocks of Kieckhefer Triangle Chalk show how the Green on the end of the V-line would go to the Spot.

PLAY at the Green from the Green Spot, Brown from the Brown Spot, Yellow from Yellow.

IF a yellow iz closer to the Dee than the V-line it will finish below the Spot.

IF further then the V-line it will finish abov the Spot, if hit hardnuff.

THE Yellow on the end of the V-line and the adjacent 2 reds need an indirekt cannon — the other 7 balls in fakt allow a choice of indirect or direkt, pleez yourself.

X-OVER The V-line iz in effekt a sort of borderline for a centerline xing. If a yellow iz closer to the Dee than the V-line, & if u hit hard enuff, then the yellow will try to X-over to the west of the centerline. Talking about indirekt-cannons here.
