Common Whiteflies in San Joaquin Valley Cotton

Bandedwing Whitefly
- Adults with bands on wings
- Immatures with fringe on edge

Greenhouse Whitefly
- Adults with white wings
- Immatures with fringe on edge

Silverleaf Whitefly (Sweetpotato Type B)
- Adults with white wings, wings held at an angle so yellow body can be seen from above
- Immatures with smooth edges, no fringe

Iris Whitefly
- Iris whitefly adults have two dots or “smudges” on the wings and are quite waxy, leaving white wax on the leaf. Nymphs have fine fringe around the edge but lose it as they mature.
