

TO THE LEFTIST PARTIES OF THE WORLD

Reform Science Center

<http://www.reformscience.org>

Dear Comrades,

As many people understand, civilization is experiencing a general ideological crisis that manifests itself now in economic crises and social unrest, now in local conflicts and terrorists acts, opening a new arms race and threatening the very destiny of civilization. Underlying that crisis, in our age of science, is the crisis of modern science itself which has proved unable to develop the proper ideology for our time and therefore needs a radical reform. Fortunately, owing to our independent research in physics, not officially recognized yet, we have got now a blue-print for such a reform. Two years ago, to proceed with the reform of modern science and engage the world scientific community in that job, we launched a website, ***The Reform Science Center***, and meanwhile created the frameworks for the sciences of politics and economics. However, the scientific establishment, anxious about the consequences of the reform, seems to have started a secret war against us, boycotting our works and blocking all our chances for getting support, thus delaying indefinitely the reform and putting the future of civilization at risk. For this reason, we have now to seek support of the leftist and progressive parties.

The main task at present is to engage universities and local scientific communities in the reform of modern science, natural sciences and humanities first of all, under the guidance of the Reform Science Center. To this end, it is necessary to start creating Reform Science Units at universities or elsewhere, coordinating their activity with the Reform Science Center.

Participation in this project, among other things, would provide you with the true ideology and greatly enhance your popularity. To join the project, create a page, ***The Reform Science Unit***, in your website and post this letter in it, to begin with; then start working to implement the project, publishing your experience and discussing it with your friends. For reference and instructions, see our works (two small books) below; with their covers enclosed, you could even publish and distribute them.

Our relevant works:

- (1) our research in physics: <http://kvisit.com/S2uuZAAQ>;
- (2) its abstract: <http://kvisit.com/ShZO9AAQ>;
- (3) its cover: <http://kvisit.com/S2-uZAAQ>;
- (4) our work in politics and economics: http://kvisit.com/So_rUAAQ;
- (5) its cover: <http://kvisit.com/St6zYAAQ>.

We are looking forward to your response.
