

Mr. John Kerry  
US Secretary of State  
Washington

5.04.13

Dear Mr. Kerry,

RE: a great project for America

I am an independent researcher, PhD, an Israeli citizen, 77. I apply to you with a project of vital importance for the destiny of civilization, the USA in particular. The reason is as follows.

Civilization is experiencing now a general ideological crisis manifesting itself in various ways, in the Israeli-Palestinian conflict in particular, and threatening the very existence of humankind. Underlying that crisis, in our age of science, is the crisis of modern science. So, to overcome that crisis, it is necessary to reform modern science and therefore education, which is certainly quite a task in itself.

Fortunately, during my life-long independent research in exact sciences and humanities, I have discovered the way to the reform of modern science and actually started it; moreover, I have recently created the logical frameworks for the sciences of politics and economics, the beginning of the true science for politicians. So, if the US Administration intends to lead the world to a more secure and just future, they could do that only scientifically and therefore should take my project seriously.

To proceed with the reform of science and attract researchers, I launched a website, The Reform Science Center, [www.reformscience.org](http://www.reformscience.org), that has already scored over a thousand of visits; now I need to develop that virtual organization into a full-fledged one, but, with my currently precarious conditions, without social and international support, that mission is beyond my capacity. Ideally, it is UNESCO that should lead the reform of science and education, but UNESCO seems to be thoroughly paralyzed by European establishment and unable to do the job. So I have decided to apply to the US administration for assistance and cooperation.

I propose that the US Administration set up for me, in the USA or Europe, and sponsor for three years, at least, an international independent organization, **THE WOLD REFORM CENTER**, aimed at reforming modern science *and* education and thus gradually overcoming the present global ideological crisis. Its functioning would provide politicians with the true ideology enabling them to solve all the currently intractable problems. It would be very much beneficial for the USA and all spheres of their society. In any case, there is no other way for social and political progress. My first task would be to put the reform of science and education on track and prepare younger researchers to substitute me when necessary.

**IN THIS CONNECTION WOULD YOU PLEASE TAKE URGENT MEASURES TO START REALIZING THIS PROJECT.** Please see more information on the matter enclosed.

Yours sincerely,

Igor Makarov, PhD, Independent Researcher
