Dr Tyrone Bowes

Who Do You Think You Are?

Guest speaker for Family Tree DNA

Who am I/ What I do

- Dr Tyrone Bowes (experienced biotechnologist)
- Pinpoint the origin of one's paternal ancestors based on Family Tree DNA's simple commercial ancestral Y-DNA37 test!
- Pinpoint where one's Surname 'Adam' lived.
- Surnames became common approximately 1000 years ago.
- Exploit the link between the Y chromosome, surname, and land which are passed from father to son.
- ***I do Personalised Case Study reports (free consultation).***
- An automated process is being pursued (in association with Brad Larkin, Texas, USA).

- Launched **Irish Origenes** in June 2011
- Launched **Scottish** and **English Origenes** in 2012, **Welsh Origenes** will be launched in 2013.

USE YOUR DNA TO REDISCOVER YOUR IRISH HERITAGE

A commercial 37 marker Y chromosome DNA test will potentially provide one with the names of many hundreds of individuals with whom one shares a common male ancestor, but what often perplexes people is how one can match many individuals with different surnames? The answer is quite simple. Roughly 1,200 years ago one's direct medieval male ancestor, the first for example to call himself 'Bowe' was living in close proximity to others with whom he was

My Bowes Y-DNA results

Some surnames reoccur as a genetic match!!!

The Cantreds of Ely O'Carroll poem by O'Heerin from 1420 describes the Kingdom of O'Carroll from the time of Brian Boru (1000AD). Courtesy of Mr Adrian Martyn

Medieval researcher, Galway City, Ireland

"Lords to whom stoop the nuts (a very odd expression)
Are the O'Carrolls of the Plain of Birra
King (Kings?) of Ely to the sweet Bloyma;
Most hospitable mansion in Ireland.

Eight tuathas (Cantreds) eight chiefs there are
Under the King of Ely - land of cattle
Brave the host in threatenng (tuar) an incursion
That yellow-waving-haired army.

O'Flanigan of the snowy hand
Rules over all the Kinel Arga (1)
Of the race of Teige, son of Kian of Crinna (1 1/2)
He dwells at hospitable Ardlick Oilill.

Over the Clan Rooney of the flowery roads
That sweet, cleared, smooth streamd country
That fair bordered, wine festive cantred
Rules Mag Corcran of the numerous tribe.

O'Hegan of Crioch Chein,
Is over the Clan Ionmhainen of smooth land
A cantred which showers a feast on every spot (2)
And a dew of honey on every cluster (pod).

The great cantred of the vigorous Clan Maonaigh
Is hereditary to O'Dooley (3)
This tribe are brave retainers
Placed at the breast of the clear streamd Bloyma.

A chief whose trees bear white nuts
Is over the Clan Conligan of heavy fruit
Twig of Biorra of Elyan tribe (4)
Mac Guilfoyle of the fair-white mansion.

Hy Deki, the goodly cantred of hills,
The wide, fair-mansioned land, (do dluthaigh duibh)
A fruitful land which adhered to them
Is O'Banan's Patrimonial (ancestorial) inheritance (5)

Their country has been mightily peopled
By the O'Meaghers of Crioch Keerin (6)
Tribe of (at) the foot of Bearnan Eile (7)
No shame to recount their exploits.

Tuath Faralt (8) of the cleared woods
Is the inheritance of O'Hailchen,
A fair mansioned plain of populous tribe,
Like the land of Tailteann, dry, tho' streamy.

historical references to my Bowes ancestors in Laois/Kilkenny/Tipperary borderlands

From the Tudor *faints*:

"163 (118). Pardon to Jordan Morreyse, of Croghan, county Tipperary, husbandman; especially for the death of **Phillip O'Bowe**, ploughman." Dated 6th April 1548 (page 104, faints of Edward VI).

"2035 (1631.) Pardon to ... **John O'Bow**, late of Brownestown, ..." dated 11 January 1572. page 261.

"5370 (4286.) Pardon to ... **Phillip O Boe**, of Corristowne, ... co. Kilkenny." dated 4 November 1589.

"6191 (5017.) Pardon to ... **Edm. Obove** ... This pardon shall be of force only for persons born or residing in the province of Munster, or County of Kilkenny." dated 17 February 1598. pages 317-18.

"6484 (5240.) Pardon to ... **Rich O Boe**, husb., ...". dated 28 March 1601. page 401.

From the "Calandar of Papal Registers:

Papal Letters vol. xv 1484-1492" the index lists three men surnamed "**O Bogue (OBinyde, Oboe, Obuy)**"

1 - John, Canon of Aghmacart, to have rectory of Kildellig, number 688.

2 - Patrick, priest of Ossory diocese, to have rectory of Rath saran and vicarage of Erke, number 674 (dated 19 April 1491, states "Patrick Obinyde, priest, d. Ossory", was the illegitimate son of unmarried parents. Apparently he also had a family).

3 - William, priest of Lismore diocese, to have vicarage of Rathdonan, number 358 (dated 25 February 1489)

Courtesy of Mr Adrian Martyn Medieval researcher, Galway City, Ireland

Once you pinpoint an area you can confirm the ancestral link with a simple commercial DNA test

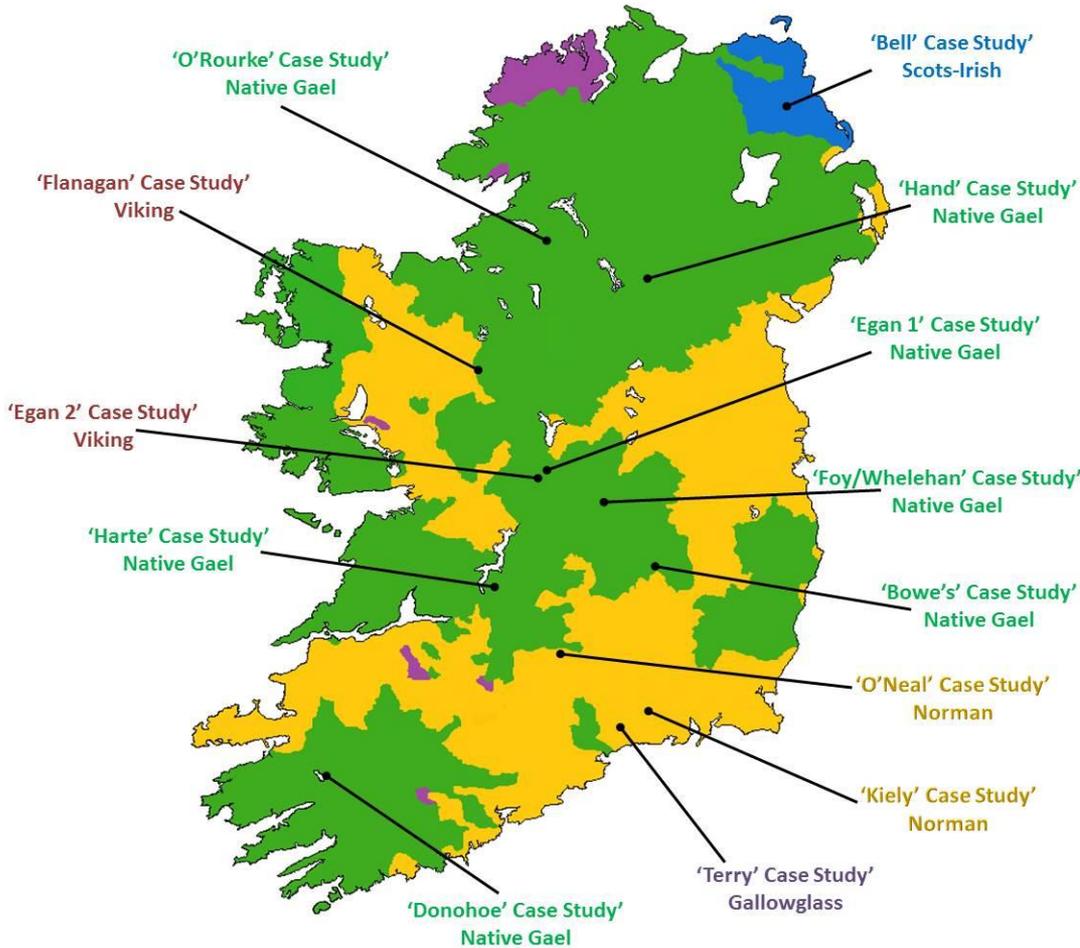

Mrs Jeane Robinson at Bowe's crossroads, County Laois, Ireland, 2011

Bowe's from this area were recruited for Y-DNA testing and were a close genetic match to me!

CAUTION

www.irishorigenes.com

People with Irish ancestry
60% Gael (pre-Christian Celtic tribes)
1-2% Viking
12-15% Norman (English/Welsh)
2-5% Scots Gallowglass
20% Plantation Scots and English

Keep an open mind!!!!!!!

USE YOUR DNA TO REDISCOVER YOUR ENGLISH HERITAGE

A commercial 37 marker Y chromosome DNA test will potentially provide one with the names of many hundreds of individuals with whom one shares a common male ancestor, but what often perplexes people is how one can match many individuals with different Surnames? The answer is quite simple. Roughly 1,000 years ago one's direct medieval male ancestor, the first for example to call himself 'Townsend' was living in close proximity to others with whom he was related but who assumed other surnames like Smith, Chadwick and Hull. Given that 1,000 years have passed since surnames were adopted, there will be many descendants of

Pinpointing an English Genetic Homeland

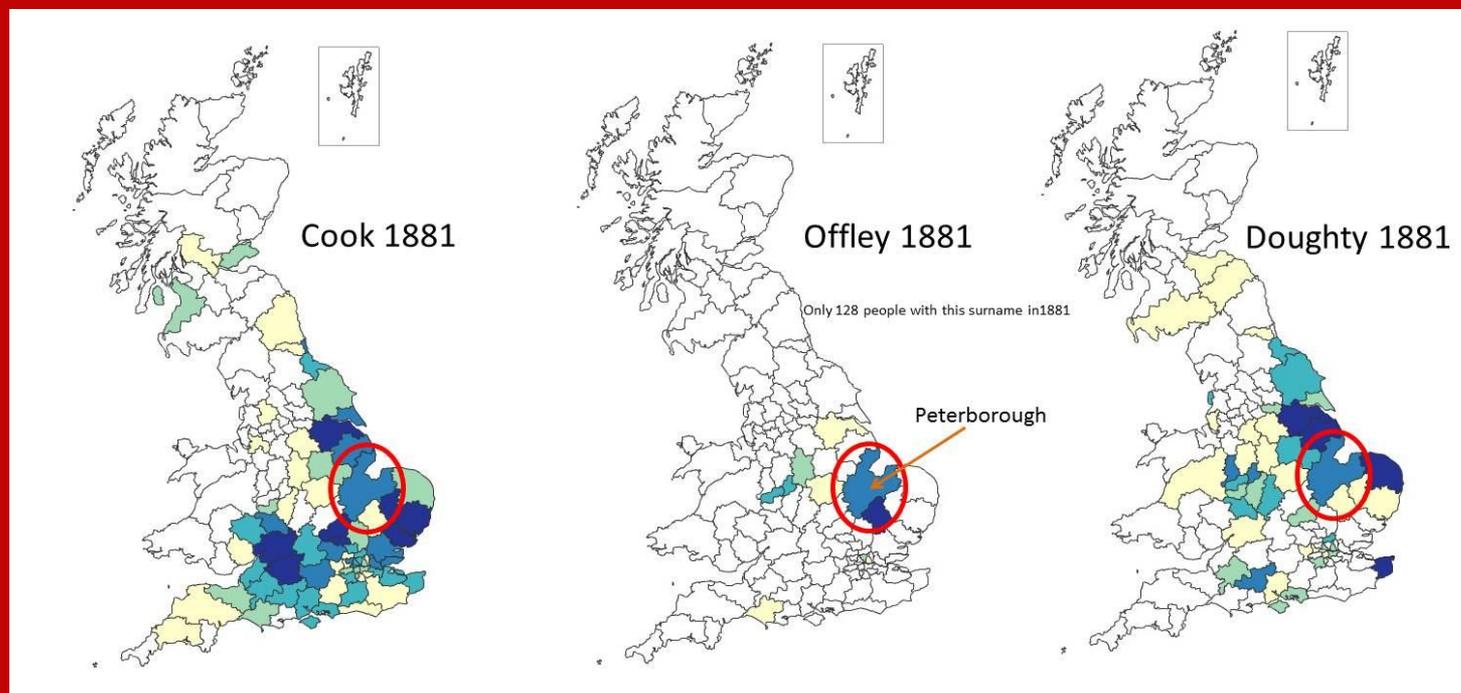

- Can be **more** challenging!
- Surnames evolved differently from the Irish and Scots
- Early Industrial revolution
- Examine earlier census data
- Many English surnames have no link to the land (no farmers)

This is the current Clan chief of the MacGregor's

The Clan that dare not speak its name

- Clan MacGregor were outlawed after slaughtering members of Clan Colquhoun (and innocent spectators) at the Battle of Fruin Glen in 1603.
- In 1603 the MacGregor surname was proclaimed 'altogidder abolished' and bearing the MacGregor name was punishable by death (80 Clan members were named and outlawed).
- In 1604 The Chief of the MacGregor's and 30 Clansmen were executed in Edinburgh
- In the 1600's the first Valentine appears in Scotland.
- Ross Valentine matches the current chief of the MacGregor's in 35/37 markers!
- In 2007 The Clan Gregor Society of Scotland agreed to accept into full membership of the Society individuals with ANY surname who can show, through DNA testing, that they have a DNA signature which matches, at the accepted degrees of mutational difference, that of the main MacGregor DNA signature.

The Future

1. The process works **BECAUSE** of the size of the **FAMILY TREE Y-DNA** database!
2. As Family Tree DNA's database of people taking the Y-DNA test gets larger and larger the success rate (for pinpointing a precise paternal geographical origin) will increase.
3. Pinpointing a maternal origin (mtDNA) can be done but requires a different approach.
4. **Automation!**

IRISH ORIGENES DATABASES FOR AUTOMATION!

Introduction

GeneticHomeland.com Mapping Technology for DNA, Surname & Genealogy Research

Mapping Technology for DNA, Surname & Genealogy Research

Introducing Genetic Homeland

Use Y-DNA, surname histories, and geographical analysis tools to identify your genetic homeland and facilitate further research and visits.

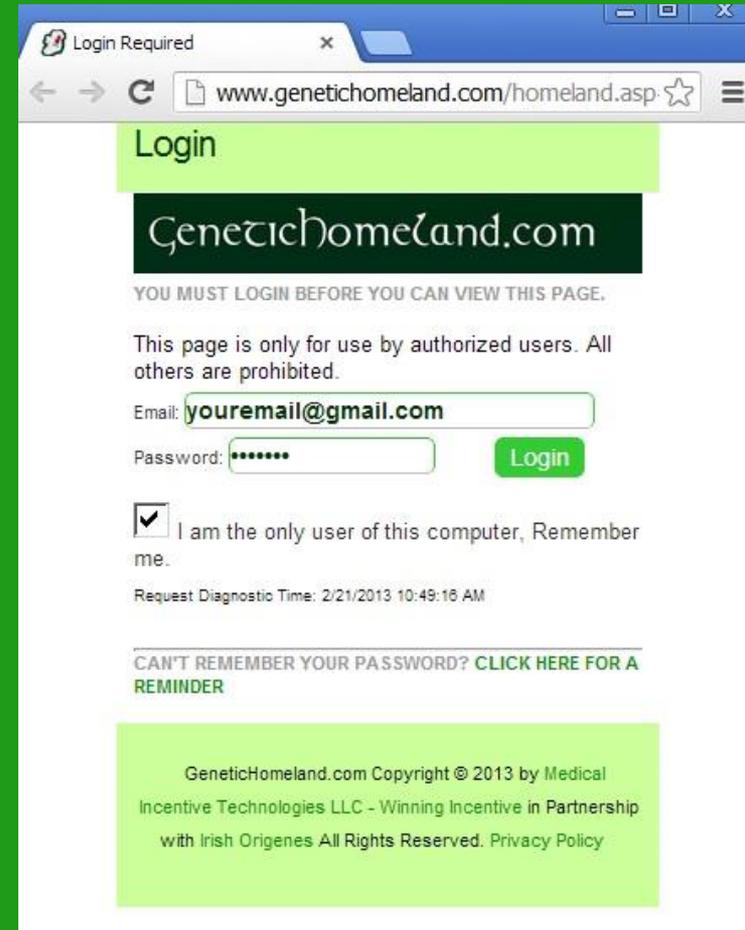

Formatted for mobile and tablet platforms as well as traditional computers.

Genetic Homeland Finder

Web query tool to search our geo-coded database of genetic and traditional genealogy records. See dynamic mapping and triangulation like you've never seen before on this scale.

Printed Maps
These are not the tired old maps from the tourist shop. These printed maps from *Irish Origins* were produced in 2012 and 2013 and compile geographic data for surnames and ancestral locations. For instance, our Castles of Ireland map is a first-of-its-kind representation of the 1,400 Castles in Ireland which are included on Genetic Homeland.com.

List Mapping

The matches on event list are mapped as a group on the interactive map below. Clusters of markers will be circular and will have a number representing how many point markers they contain. Click on a cluster to expand and see the subclusters and individual points. Points will have a pin icon with an identification number corresponding to the Map No on the Results List (e.g. 003). Click on the pins to see a brief description of that point.

Mapping Technology for DNA, Surname & Genealogy Research

Genetic Homeland Finder Search Engine

- Use Y-DNA, surname histories, and geographical analysis tools to identify your genetic homeland.
- Genetic Homeland Finder lets you visualize how multiple surnames and data sources intersect to help overcome 'brick walls' in your genealogy.
- Dynamically add / remove records lets you manipulate the map in real-time to test hypotheses.
- Also facilitates further research and site visits.
- Built for PC, Mac, mobile phone or tablet use.

Special Offer

In partnership with IrishOrigenes.com, we are offering 20 surname & data set searches for free to participants in the **2013 Who Do You Think You Are conference** in London.

Register for the free usage offer and to receive more information about updates and news as data sources are added to the GeneticHomeland.com database.
