

PROJECT FOR LEFTIST ORGANIZATIONS
The Reform Science Center

Dear Comrades,

We apply to you with a project aimed at reforming modern science and education, which is of vital importance both for Europe and the whole civilization. The reason for the project is as follows.

Civilization is experiencing now a general ideological crisis, in the field of the socialist ideology in particular, the crisis manifesting itself in various ways and threatening the very existence of humankind. Underlying that crisis, in our age of science, is the crisis of modern science. So, to overcome that crisis, it is necessary to reform modern science and therefore education, which is certainly quite a task in itself.

Fortunately, during our independent research in exact sciences and humanities, we have discovered the way to the reform of modern science and actually started it. Recently, we have created the logical frameworks for the sciences of politics and economics, http://kvisit.com/So_rUAQ; those works, based on Hegel's dialectical logic, show what the true socialist society is and what steps lead to it; they seem to be the true development of the Marxist theory.

To proceed with the reform of science and attract researchers, we launched a website, The Reform Science Center, www.reformscience.org, that has already scored over a thousand of visits; now it is necessary to develop that virtual organization into a full-fledged international one, which requires a wide international support and is beyond our capacity. Ideally, it is UNESCO that should lead the reform of science and education, but UNESCO seems to be paralyzed by the conservative circles of establishment and is indifferent to our calls. So we should now seek assistance of clearly socialist organizations.

In this connection we propose that your party assist us in setting up an international independent organization, **THE WOLD REFORM CENTER (WRC)**, aimed at reforming modern science and education on a global scale and thus gradually overcoming the present global ideological crisis. In time, the WRC would become a complement of UNESCO in the field of science and education and attract good donations from all over the world. Its functioning would provide your party with the true ideology and greatly enhance its popularity. It would be very much beneficial for every country and all the spheres of society. In any case, there is no other way for social and political progress.

If set up, we would like to direct the Center at its early stage to put the reform of science on track and prepare younger researchers to substitute us when necessary. So you might simply set up a WRC office (for seven or so persons, to begin with) in Europe, invite us to lead it and sponsor its work for two years, at least.

In this connection would you please consider an opportunity to support this project; see additional relevant information enclosed. We are looking forward to your response and would like to be in a regular contact with you on this matter.

Yours sincerely,
Igor Makarov, PhD
