

Mr. Mohamed Sameh Amr
Chairman
Executive Board
UNESCO

24.03.14

Dear Mr. Amr,

RE: new UNESCO mission

I am an independent researcher, PhD, an Israeli citizen, 78. During my decades-long research in exact sciences and humanities, it became clear that civilization is experiencing a general ideological crisis now threatening the very existence of humankind. Underlying that crisis, as my analysis shows, is mainly the crisis of modern science. So it is of vital importance to take urgent measures to start reforming modern science, as well as philosophy and religion, harmonizing them with each other.

I have started such a reform on my own, achieved remarkable results and developed a general methodology for it. But such a historic mission cannot hinge long on the enthusiasm of a pensioner, it is UNESCO that should take over that mission and lead it as its most important activity. I have many times applied to UNESCO for support in this respect, but there has been no promising response.

In this connection would you please consider my enclosed papers and answer the following questions:

- (1) What scientific material and arguments should I submit to the Executive Board to redirect the current UNESCO programs to reforming modern science, philosophy and religion?
- (2) Is it possible to create a new UNESCO department, possibly under my direction for two years at least, with a special program of reforming the above disciplines?
- (3) Otherwise, what would be necessary for UNESCO to create a new institute, THE REFORM SCIENCE CENTER, for example, for the above mission under my direction, instead of my present virtual organization?

Yours sincerely,
Igor Makarov, PhD
Director /Independent Researcher
