

Arrival Information

In the air 10-15 miles out! Give us a call on 122.9 - We will be giving traffic advisories for the active runway 21 / 3 3 is preferred Remember traffic clearance / avoidance on the ground or in the air is always pilots responsibility! You make all the safe decisions and we'll make the rest of it work!

IF YOU WANT AN ARRIVAL PICTURE Please tell us !
The best arrival picture is 20 ft over the AAA on RWY 3 :-)

Pattern Altitude is 1,900 feet and there is a campground across the lake on the south end. Please don't be real low over the campground. Shouldn't be a problem, lots of room!

Landing If you will try to be 20- 30 feet or less over the displaced threshold, we will try for some nice pictures! **Please do not land short in the ramp area !!** Runway is 5,000 feet. The turnarond is at 1,000 feet. Just past the numbers for RWY 3 is fine!

On the ground THERE IS NO TAXIWAY You **may** have to backtaxi depending on the runway. Please listen to the AirBoss and you should announce "BACKTAXI on Runway XX" on 122.9 There should be "AC parkers" in yellow vests! About half the parking will be on the grass. It's good grass taxi and should not be a problem. The grass parking at Petit Jean is better than most grass runways but taxi SLOWLY !

Be careful with your prop blast! Please don't spin ...WE WILL PUSH into final parking positions!
 If you are planning on flying while here or leaving on Saturday, please give us a signal when parking.
