

ADVANCED CARDIAC LIFE

Course Description: ACLS is an advanced instructor-led classroom course that highlights the importance of team dynamics and communication, systems of care and immediate post-cardiac-arrest care. It also covers airway management and related pharmacology. In this course, skills are taught in large, group sessions and small, group learning and testing stations where case-based scenarios are presented. *Fees collected for American Heart Association courses do not reflect revenue for the AHA.*

Course Objectives:

- Recognize the adult in peri-arrest and/or at risk of cardiopulmonary arrest;
- Demonstrate the cognitive and psychomotor skills necessary for resuscitating and stabilizing the adult in respiratory failure, shock, or cardiopulmonary arrest;
- Demonstrate the use of the various airway and oxygen adjuncts and methods for optimum ventilation & airway control;
- Identify normal vs. abnormal cardiac rhythms and the appropriate pharmacologic and electrical therapies;
- State the indications & dosages of medications used in cardiopulmonary arrest and the effects on the cardiovascular system;
- Perform advanced skills in the assessment and treatment of cardiopulmonary arrest in the adult patient.
