STALLION LEATHER (A, G, J, L)

For many years we've been striving to get the best leather in the world for making anklets, jesses and lures. In the end, every falconer will make their own judgements on what's best for their birds. But before you do, you've just got to try Stallion Leather, only available from The Identity Store. It's a special leather cut taken from nearest the croup region of the horse. The croup is the large muscle mass across a horse's hindquarters. The leather it gives is extremely dense and non-porous. The fibres are multi-directional with thousands of crossover points per square inch. Stallion is comparable in strength to kangaroo. It is water resistant with a waxy feel and characteristic look.

The stallion comes in all different sized pieces from which anklets and jesses can be cut, either 1.4-1.6mm, or 1.6-2.0mm

Approx.

1 sq ft = £10, approx. 1.5 sq ft = £15, approx. 2 sq ft = £20

PIECES BAGS
