

FAQs about Fenix HP40H

1. What is the product positioning of HP40H and who are the target customers?

The HP40H is a versatile hunting headlamp featuring dual color light sources. Its 150-lumen red spot light is designed for hunting game, while the 450-lumen white flood light satisfies various lighting demands before and after hunting, such as hiking and camping.

2. What are the key features and benefits of HP40H?

- 150-lumen red light
- 450-lumen white light
- Individual control system
- Rugged aluminum chassis

3. Why is the red light the best solution for night hunting?

1. Red light enables the eye to most quickly readjust to darkness so as to protect the night vision, a dark - adapted state of our retinas.
2. Hunters love a red light because it helps retain their camouflage without spooking animals while hunting at night.
3. The red spot light of HP40H has a great beam distance up to 105 meters to extend hunters' visual range.

4. Could I turn on the red and white light at the same time?

No, you could not. When the white light is turned on, activating the red light will automatically turn off the white and vice versa.
