

FAQs about Fenix CL25R

Q: What is the product positioning of CL25R and who are its target customers?

A: Designed for all-season camping, CL25R features high portability, high intensity and a special structure for low temperature performance. It offers six outputs including a moonlight mode and red light from one 18650 Li-ion rechargeable battery or two CR123A batteries. With built-in hanging loop, tripod socket and magnet, rechargeable CL25R is an all-purpose camping lantern whether on campsite or in tent.

Q: What are the key features and benefits of CL25R?

- A:
1. High intensity and wide illumination range
 2. Cold-resistant structure
 3. Micro-USB charging function
 4. White light and red light
 5. Hanging loop, tripod socket and magnetic base

Q: How can I enter into red light mode?

A: Double press the switch to activate constant-on red light when the light is turned on, then a single press on the switch again allows the CL25R to enter into flashing red mode.

Q: Is the CL25R resistant to water when USB charging port is uncovered?

A: NO.

Only when the USB port is covered with USB cap will the CL25R be water-resistant to IPX-6 standard.

Q: Will the cold-resistant structure cause low-efficient heat dissipation?

A: NO.

Via changing heat dissipation paths, rather than impeding heat dissipating, the cold-resistant structure won't compromise the heat-dissipating capacity of the light.
