Dr. Dmitry Borisovich Zimin  
Academician  
Founder of the Dynasty Fund  
Moscow

Dear Dmitry Borisovich,

RE: proposal of assistance and cooperation

I have recently got to know about your Dynasty Fund and decided to consult you about your possible assistance in my mission and perhaps a wider cooperation. I am an independent researcher, PhD (Candidate of Sciences in Technology, 1965), currently an Israeli pensioner, 79.

During my independent research in exact sciences and humanities, that I started 45 years ago in Russia and, since July 1992, have proceeded with in Israel, Europe and Canada, I achieved the following:

- (1) reformed modern theoretical physics;
- (2) discovered the true philosophy of science: the true systems theory;
- (3) created a methodology for reforming modern science in general;
- (4) created the frameworks of the true sciences of politics and economics, the sciences nonexistent or underdeveloped before and socially most important.

**Those achievements, when recognized, would signify actually a turning point in the history of science and civilization.** However, because of the present crisis of modern science and its institutions, the above achievements have not been recognized officially yet. Moreover, there is some kind of conspiracy against me aimed at isolating me from the scientific community. Nevertheless, I have managed to publish some of my works in hard copies and online.

In the course of the above research, it has become clear that the present monstrous crisis of modern science and its institutions, along with the crisis of modern philosophy and religion, has been underlying the present general ideological crisis, now at its crucial stage threatening the very existence of humankind. **Therefore, for civilization to survive, it is necessary to start reforming modern science, philosophy and religion.** I have started such a reform, launched a dedicated website, but now need an international support.

At present I have been seeking an opportunity to establish an NGO, possibly in Switzerland, titled perhaps THE WORLD REFORM CENTER (WRC), aimed at reforming modern science, philosophy and religion. The main tasks of the WRC would be as follows:

- (1) attracting highly professional researchers and philosophers worldwide to start reforming science in their field of interest, creating first frameworks of the new sciences and then developing them into textbooks and online courses for universities; my enclosed works being used for guidance and as examples; at present I expect great results in reforming biology and microbiology, in particular;
- (2) attracting philosophers of religion to start creating the science of religion suitable for universities;
- (3) holding an online ARCHIVE to keep research works and a BULLETIN for the state of research;
- (4) raising a fund to run the Center, attract scientists, stimulate their work and reward their success; I expect enthusiastic donations from organizations and private persons.

I think our cooperation in this mission, apart from its fiscal advantage, would make it possible to optimize the Dynasty Fund programs with great benefits for the Russian science, research, education and society. I would like to run the Center, for two years at least, and prepare younger researchers to substitute me when necessary. Otherwise somebody else could do that using my instructions and

consulting me if necessary. It would be possible to start the project simply with editing, developing, publishing and teaching my enclosed works. In time the Center may grow into a large institution worth getting support from UNESCO.

To begin with, it would be perhaps possible to make use of the **Support Program for Conferences on Fundamental Physics** to organize a CONFERENCE titled, for example, “**Dialectical Methods in Theoretical Physics**”, aimed at discussing my research in physics and its implications for physics and, perhaps, modern science in general, where I could make 3-4 reports (physics, theory of science, politics, and perhaps economics).

In this connection would you please consider my proposal about the conference in physics and, perhaps, the prospect of our wider cooperation. Please see more information in the online papers enclosed. I am looking forward to your opinion.

Yours sincerely,

Igor Makarov, PhD,

Independent Researcher
