M	Mouse	E	Egg
NR	Nest Removed	Y	Young
S	House Sparrow	RF	Ready to Fledge
F	Young Fledged	IN	Incomplete nest
B	Bluebird	W	WoodDuck

July 29, 2015 --This has been a good year for Tree Swallows and Woodducks, but a slow year for the Bluebirds. This will likely be the last nest monitoring report for the 2015 year. The spring was a cool and wet year, maybe it will be better next year. I have included some pictures that I took for this report. There is a picture of some young Wrens, wild flowers, a flock of Killdeers on the field, a Red Headed Woodpecker that likes the wooded area, and a couple of dragon flies that are enjoying the area. There is always something to see.
