# Getting started

<https://help.shopify.com/manual/sell-online/getting-started/online-store>

## Step 1: Configure your basic administrative settings

Before you start adding products and setting up your payments, there are a few administrative tasks that you should do:

1. [Complete the initial setup](#) so that your store address, email address, and other store settings are up to date.
2. [Know where to manage your account](#) and access your billing information.
3. [Add staff accounts](#) so that each of your staff members has a personal login account and all sensitive account information remains secure.

## Step 2: Add and organize your products

Now that you've completed your [initial store setup](#), you can add products to your Shopify store.

### 📌 Did you know?

If you are selling **digital products or services**, make sure you are familiar with the differences between digital and physical goods.

If you don't have anything in your store yet, then you can start with some of the basics:

1. [Add your products](#) to your store.
2. [Configure the taxes](#) for your products.
3. [Add meta descriptions](#) to your products to increase your website's visibility in web searches done with search engines like Google and Bing.

If you're not sure where to start, then you can find out more about [Shopify's features to improve your store's SEO](#).

4. [Create product variants](#) if you will be selling multiple versions of your products. For example, you are selling art prints in multiple sizes, or you are selling a shoe style that is available in different colors.
5. [Create a collection](#) to organize your products into categories and make them easier for your customers to find.

You can [add drop-down menus](#) and [create links](#) to collections right on your storefront.

6. [Get familiar with product inventory and transfers](#) since you'll want to keep track of the products that you have available in your store.

You can even find [inventory apps](#) in the Shopify App Store that can help you with this task.

## Step 3: Configure your taxes

Charging sales tax is an important part of running your business. Depending on your location, there are different rules and regulations about sales tax that apply to your products. To make sure that your store meets those rules, take some time to understand Shopify's [tax setup process](#).

### Note

If your store ships to Europe, note that there are [regulations](#) that apply when selling **digital products**.

### Charge taxes based on your shipping destinations

When you [set up your shipping](#), you can [apply shipping taxes](#) to your products based on the customer's provincial, state, or regional tax regulations. These are calculated automatically by Shopify.

If you need to adjust taxes manually, based on a region with unique tax restrictions or based on a specific collection of products, you can do so with a [tax override](#).

### Keep track of your taxes

When you configure the tax settings for your products, you should also think about how you are going to [keep track of your taxes throughout the year](#).

If you're not sure about what system you are going to use to keep track of your taxes, you may want to look at some [accounting apps](#) in the Shopify App Store.

## Step 4: Set up your shipping

It's very important to set up shipping rates and shipping methods correctly before you launch — you don't want to be refunding customers for overcharging them, or emailing them and asking them to pay more because you didn't charge enough to cover the shipping of their order.

Need some background on shipping? Have a look at this [Shipping and Fulfillment guide](#).

### Note

If you are selling **digital products or services**, then you need to [disable the shipping option](#) because your customers won't be receiving any physical goods.

To set up your shipping:

1. [Add your shipping address](#) to get accurate shipping rates based on your location.
2. [Add shipping destinations](#) to enable shipping to different regions, states, and countries by configuring shipping zones.
3. [Configure your shipment dimensions](#) if you're using carrier-calculated shipping rates. Many carriers use volumetric weights of your shipments (the height, weight, and depth of your package) to calculate their shipping rates.
4. [Set up shipping rates](#) for the shipping zones that you've created.
5. [Pick a shipping strategy](#) that works for your business. You might find it helpful to look through some [options](#) and see what best fits your needs before making a decision.
6. [Look through fulfillment services](#) and decide if you're going to ship the orders yourself or let someone else do it for you.

## Step 5: Activate your online sales channels

You can use Shopify to reach your customers wherever you do business, whether it's in person, through your Shopify store, or elsewhere online. Each place where you sell your products appears in your Shopify admin as a separate [sales channel](#).

There are several **online** channels that you can add to your Shopify admin to sell online:

- [Shopify Buy Buttons](#)
- [Facebook](#)
- [Pinterest](#)
- [Twitter](#)

### Note

Each sales channel has eligibility requirements that are based on your region, your product types, and sometimes on your Shopify plan.

# Step 6: Make sure customers can pay you

To make sure that customers can pay you, you need to set up a [payment gateway](#). A payment gateway lets you accept credit card payments securely. Shopify offers its own payment gateway (Shopify Payments) as well as a list of supported [third-party payment gateways](#).

To set up a payment gateway:

1. Set up a payment gateway in your Shopify admin.

 Did you know? When you choose Shopify Payments, you can avoid paying additional transaction fees and you can use Shopify Payments in your Shopify admin.

2. Enable Shopify Payments in your Shopify admin.
3. Check out the [Shopify Payments](#) page to see how to buy something from your store.

Now that you've set up payment gateways, you need to update your checkout page so you can process customer orders.

To set up your checkout:

1. Decide how you want to process customer orders so you have a strategy to fulfill the orders.
2. Add your store's policies so your customers are aware of them before they complete checkout.
3. Collect customer emails and use them to update customers about events and promotions.

## Step 7: Place some test orders

Now that you've configured your payment gateway, you should try out a few transactions to make sure that everything is working. [Running a test transaction](#) can help you understand the process your customers go through when they purchase products. You can also check that you can access all of the orders that customers place.

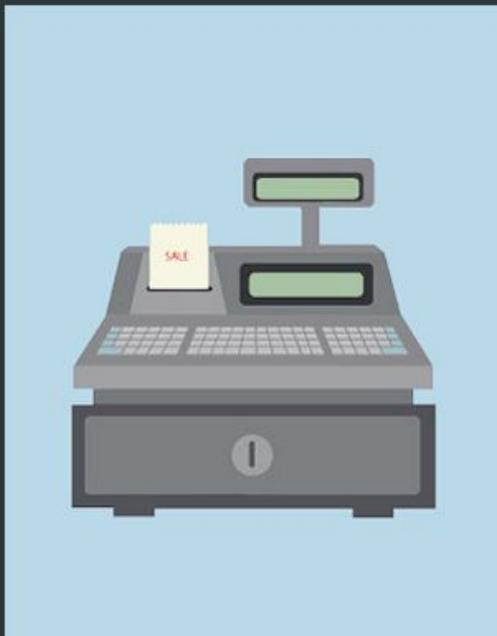

You can run a test transaction:

- completing a [test transaction](#)
- refunding an order
- fulfilling an order
- applying a discount

As you create, cancel, and fulfill orders, you can view the [emails](#) that your customers receive at each stage. You can also create [templates](#) for these emails from the [Notifications](#) page in your Shopify admin.

This screenshot shows the Microsoft Dynamics CRM 2011 interface. The main window displays a record for 'AMBIT 81'. The left-hand navigation pane includes sections for 'Home', 'Accounts', 'Accounts and Contacts', 'Accounts and Opportunities', 'Accounts and Leads', and 'Accounts and Campaigns'. The central area is divided into several tabs: 'Details', 'Activities', 'Relationships', and 'Budgets and Expenses'. The 'Details' tab is active, showing a 'Name' field with the value 'AMBIT 81' and a 'Description' field with the text 'AMBIT 81 - 2011-2012'. Below this, there are sections for 'Relationships' and 'Budgets and Expenses'. The 'Relationships' section shows a list of related records, and the 'Budgets and Expenses' section shows a table with columns for 'Budget', 'Actual', and 'Variance'. The right-hand pane contains a 'Summary' section with a progress indicator and a 'Details' section with a list of related records.

This screenshot shows the Microsoft Dynamics CRM 2011 interface for a 'Campaign' record. The main window displays a record for 'Campaign Drive Drop price'. The left-hand navigation pane includes sections for 'Home', 'Accounts', 'Accounts and Contacts', 'Accounts and Opportunities', 'Accounts and Leads', and 'Accounts and Campaigns'. The central area is divided into several tabs: 'Details', 'Activities', 'Relationships', and 'Budgets and Expenses'. The 'Details' tab is active, showing a 'Name' field with the value 'Campaign Drive Drop price' and a 'Description' field with the text 'Campaign Drive Drop price'. Below this, there are sections for 'Relationships' and 'Budgets and Expenses'. The 'Relationships' section shows a table with columns for 'Name', 'Status', 'Created On', 'Modified On', and 'Created By'. The 'Budgets and Expenses' section shows a table with columns for 'Budget', 'Actual', and 'Variance'. The right-hand pane contains a 'Summary' section with a progress indicator and a 'Details' section with a list of related records.

This screenshot shows the Microsoft Dynamics CRM 2011 interface for a 'Lead' record. The main window displays a record for 'Lead'. The left-hand navigation pane includes sections for 'Home', 'Accounts', 'Accounts and Contacts', 'Accounts and Opportunities', 'Accounts and Leads', and 'Accounts and Campaigns'. The central area is divided into several tabs: 'Details', 'Activities', 'Relationships', and 'Budgets and Expenses'. The 'Details' tab is active, showing a 'Name' field with the value 'Lead' and a 'Description' field with the text 'Lead'. Below this, there are sections for 'Relationships' and 'Budgets and Expenses'. The 'Relationships' section shows a table with columns for 'Name', 'Status', 'Created On', 'Modified On', and 'Created By'. The 'Budgets and Expenses' section shows a table with columns for 'Budget', 'Actual', and 'Variance'. The right-hand pane contains a 'Summary' section with a progress indicator and a 'Details' section with a list of related records.

# ROADMAP

The screenshot shows a Trello board for 'Retail roadmap for Bristol Culture'. The board is organized into columns representing different stages or categories of work:

- Q3 Oct to Dec:** Contains cards for '2016-17 priorities', 'BUYING', 'FINANCE', 'SHOP FLOOR SKILLS', and 'VISUAL MERCHANDISING'.
- Q4 January to March:** Contains cards for '2017-18 income target = projected Visits / conversion \* atv', 'BMAG shop refit phase 2 [pending funding]', and 'Focus on Jewellery and higher ATV'.
- Done:** Contains completed tasks like 'Launch Central Library mini shop', 'Add supplier Sea gems', '6th Oct agenda with retail thinking', 'Place first order: old Folding maps Ltd', and 'Monday 19th sept 2016 [weekly]'.
- Stalled:** Contains cards for 'Newgate watches from Top Drawer "The Ship"', 'The real pearl company from Top Drawer', 'Improving Blaise Castle offer', 'Bespoke Alfred and Bmag postcard and magnet.', 'Books on Transatlantic Slave Trade for retail', 'Key retail events calendar', and 'Collection suggestions for popular images for use for retail'.
- New suppliers:** Contains links to various suppliers.

The interface includes a search bar, a user profile for Zak Mensah, and a 'Show Menu' option. Each card has a progress indicator (red bar) and a 'Add a card...' button at the bottom.
