

DUST FREE BEDDING BIOSECURITY • PREMIUM FEED

FREE OF DUST, MOLD, ALLERGENS & NOXIOUS WEEDS

GOLD FIELDS

www.goldfieldscanada.com

ABSORBENT: Significantly more absorbent than raw straw and comparable to other leading bedding products.

BIOSECURITY: Sourced from clean wheat fields and is protected from contamination before and after production in our biosecure facility.

ANIMAL HEALTH: Reduces animal exposure to harmful dust, mold, salmonella and other pathogenic organisms, improving animal health and comfort.

MORE COVERAGE: Has more bedding than a standard bag of wood shavings, but at a similar price.

CONVENIENCE: Easy to lift, carry, and spread out.

COMPOSTABLE: Forms a complete biological cycle that takes 100% wheat straw from grain crops and returns the used straw back to the soil as an excellent compost and organic enhancer.

ODOR REDUCTION: Reduces barn odor by trapping ammonia gasses in the layers of straw.

EMPLOYEE WELLNESS: Employees no longer have to breathe in the dust and mold that comes from working with regular straw bales or wood shavings.

RELIABLE SUPPLY: Animal bedding is our business, not a by-product or an afterthought. As a result, Goldfields is available on-time, when you need it.
