

Ambassador Wolfgang Ischinger  
Chairman  
Munich Security Conference 2018  
Munich, Germany

16.02.2018

Dear Ambassador Ischinger,  
RE: KEY SECURITY PROBLEM

The proper solutions of most of the security and existential problems, that are scheduled for discussion at this conference, need an academic approach that the current conference is not designed to provide. On the other hand, my decades-long independent research in system theory, exact sciences and humanities (not recognized officially yet) can already offer theoretical solutions to most pressing political, economic and social security problems, as well as the problem of global security.

To start practical realization of those theoretical achievements, I need a broad international support that I have been unable to get so far, given my independent status, the general ideological crisis, the monstrous crisis of modern science and the corruption of scientific institutions. But the MSC-2018 provides a good chance to cardinaly improve the present hopeless situation and find the proper solution to the above KEY SECURITY PROBLEM.

The practical realization of the main social and political security problems requires the reform of the ideology of modern society, that is its science, philosophy and religion. I have already started such a reform, achieved significant results (the reform of modern physics and the science of politics, for example) and worked out the general methodology of the reform. To proceed with the reform on a large scale, I need a Coordinating Center, an NGO for ten or so persons, sponsored for two years, at least. Given my age, I would like just to put such a reform on track and prepare younger researchers to substitute me when necessary.

In this connection would you please propose the MSC to include the following items in its decision:  
(1) to assign a commission to evaluate my works (see Enclosure) from the scientific point of view, possibly, in close cooperation with myself;  
(2) in case of a positive result of the above evaluation, to establish the above NGO, possibly in Switzerland, with a Fund of US\$10 million, and to assign me Director General of the new institute for three years, at least.

Yours sincerely,  
Igor Makarov, PhD  
Independent Researcher
