

VulniCura

MANUFACTURED EXCLUSIVELY FOR GOLDFIELDS CANADA

ALL IN ONE VETERINARY WOUND AND BACTERIAL TREATMENT

VULNICURA ALL IN ONE

VulniCura is an All-in-one Veterinary product that helps to heal wounds AND to treat problems caused by the presence of bacteria and pathogens such as thrush & rain rot on horses and mange on dogs. VulniCura is based on a patented safe-acid technology.

VulniCura is not derived from Chlorine-based compounds and contains no toxic chemicals that may be harmful to humans and animals. The new standard of Veterinarian products with our patented low pH Technology that is NOT derived from a chlorine base compound and contains NO steroids. VulniCura will not harm healthy tissue, Our product Triggers the body's own response, releasing oxygen to the wound site helping to generate chemotaxins to attract host defence cells. It activates clotting to prevent fluid loss, and stimulating cell growth factors reducing scarring and hair loss. VulniCura starts the healing from the inside out by reducing the bacteria and pathogen count.
