For tutorials and pics for this pattern go to victats.blogspot.com

Wind 2 yards of size 20 thread on a shuttle CTM with ball (you need 3 yards of ball thread)

You start by making 2 rings that are joined together with the square in between.

R1 6 lp 1 lp 1 lp 6 lp 1 lp 1 lp 6 lp 1 lp 1 lp 6 lp 1 lp 1 close ring and leave a space of thread the same length of the picots then start the next ring. This counts are your first picot.

All picots on R2 join to the same ordered picot on ring 1

R2 1 + 1 + 6 + 1 + 1 + 6 + 1 + 1 + 6 + 1 + 1 + 6 add in the gem so it faces you before you close the ring. The points of the square go between the groups of 3 picots.

Round 1

Leave a space of thread from the ball thread and the shuttle thread so they meet half way between the rings

If you look at the rings there are 4 groupings of 3 picots. When joining I will refer to the first picot of group or the last picot of group.

***C1** 2 p 2 lj (last picot of group)

C2 6

SCMR 3 p 3

C3 6 lj (1st picot of group)*

Repeat from * to * joining back to the beginning. Do not cut, go into round 2

Round 2

***C1** 6 p 6 lj(space above lj round 1)

C2 12 lj (p on SCMR)

C3 3 p 3 lj (same p on SCMR)

C4 12 lj (space above next lj round 1)*

Repeat from * to * around. Tie and cut.

Tatty Square Ice Drop Round 1

Tatty Square Ice Drop Round 2

Terms

R- ring

C- chain

SCMR- self closing mock ring

lj- lock join

lp- long picot

p- picot

+ join

Materials: size 20 thread, square gem (12mm)
