

Ms. Federica Mogherini
High Representative of the EU for Foreign Affairs and Security Policy
Brussels

20.11.18

Dear Ms. Mogherini,

RE: scientific measures for European and global security

In the wake of the recent tragic events in the city of Chemnitz, we, New Marxists of Europe, would like to give a scientific estimation of those events and, trying to drive a benefit from them, propose a project that would make Europe and the whole world more secure.

In our view, the main reasons for the above events are the following:

- (1) the present general ideological crisis of civilization;
- (2) the general crisis of the state power;
- (3) the general crisis of modern science and humanities;
- (4) the general corruption of universities and scientific institutions;
- (5) the general degradation of moral.

As a result of this general crisis and degradation, civilization has been approaching a new world war. So, for civilization to survive, modern society, Europe first of all, should be reformed. We, New Marxists of Europe, during our decades-long independent research in exact sciences and humanities, have started the reform of modern science, developed the true methodology for it and created the frameworks of the true sciences of politics and economics. With these achievements, we are now in a position to propose the following measures to reverse the above fatal global trend:

- (1) to reorganize thoroughly UNESCO and commit it to the task of reforming the ideology of modern society, that is modern science, philosophy, religion and education;
- (2) to start reforming the Western society into a socialist society by creating a competent public sector of economy and the public self-governance;
- (3) in the Eastern Europe, Ukraine and Russia, contrary to the present Western policy, to start a powerful propaganda of the ideology of public self-governance, the true socialism, in order to overcome the present nationalist ideology and provoke united civil wars there against the oligarchical regimes, for democracy and public self-governance, first of all in Russia and Ukraine;
- (4) as to the migrants in Europe, they could be educated in the new ideology and, possibly, sent back to their native countries to fight for a new life and a new society there.

In this connection would you please take measures to set up a scientific center under our direction, either in UNESCO or elsewhere in Europe, to guide and coordinate the above reformatory activity.

Yours sincerely,

Igor Makarov, PhD

Independent Researcher
