

Mr. Benjamin Netanyahu
Prime Minister of Israel
Prime Minister's Office
Jerusalem

13.05.2020

Dear Mr. Netanyahu:

RE: appeal to seriously enlighten Academy

I am an Israeli citizen, 84, an independent researcher, PhD. I apply to you for your urgent assistance in my scientific mission vital for the destiny of civilization.

My current mission, based on my decades-long research in exact sciences and humanities, is aimed at settling the present general ideological crisis now threatening the very existence of humankind, the destiny of the Jewish people, in particular. With such a mission, I have got powerful enemies trying to obstruct me wherever possible.

Nowadays is a critical time for civilization, the time to decide on its future, its proper global ideology. Israel seems to be a ghetto-state, with a powerful army but actually with no proper global ideology. Thus Israel seems to be a state without a future. That fact may perhaps be of primary concern for Prime Minister. If so, you perhaps pay the proper attention to what has been happening at the Israel Academy of Sciences and Humanities, the main source of modern scientific knowledge and therefore of modern ideology. So who and to what purpose leads that influential establishment?

My research, in my view, is a turning point in the history of science and civilization. Given the present crisis of modern science and its institutions, I have encountered insurmountable obstacles when trying to get my research works recognized officially. Recently I have once again applied for assistance to the Israel Academy, but again in vain, as if there had been no such research as mine, nor its author. I am acquainted with such a nationalistic, arrogant attitude to me, an independent researcher - a European conspiracy initiated by Russian agents, the conspiracy regrettably involving Israel. But now that the future of civilization is at risk, such an almost fascist conspiracy should be broken.

In this connection, given my decades-long record of similar unanswered letters to you and the Knesset, taking into account that civilization may die, unless the proper measures are taken, the ones only my research works could now provide, while the present Academy administration does not seem to have responsibility beyond the current Zionist ideology, would you please explain them the national and international importance of my mission and have them start evaluating officially, possibly with my participation, the scientific value of my research works, as was requested by my previous letters and reiterated by my recent letter to them, its URL enclosed.

Yours sincerely,

Igor Makarov, ID310295142

512/51 Hativat Carmeli, 32629 Haifa, Israel
