

5.101.2020
Mr. Reuven Rivlin
President of the State of Israel
President's Office
Jerusalem, Israel

Dear Mr. President:

RE: an inadmissible conduct by the Israel Academy of Sciences and Humanities

I am an Israel citizen, 85, an independent researcher, PhD, with a great 40-year-long research in exact sciences and humanities, the research being of great importance, in my opinion, for modern society, in general, and, as regards the current pandemic, for the immunity of society to diseases, in particular.

Indeed, the immunity of human society to diseases, the corona virus, in particular, depends on the extent of its spiritual unity and organization: the higher its organization the higher its immunity. My above research, if recognized officially, would be decisively helpful, in my opinion, in overcoming the present general ideological crisis of civilization and therefore could greatly increase the spiritual organization of modern society and its immunity to diseases. However the Israel Academy of Sciences and Humanities, currently the only organization that can and must define the scientific value of my research works, has repeatedly refused, mainly because of my independent status and, perhaps, on instruction by Russian agents, to do the job. Now that the whole world has been struggling to overcome the deadly Covid-19 pandemic, such an attitude by the Academy to my works should be considered an international crime.

In this connection couldn't you please support my efforts to start a legal procedure against the administration of the Academy. Please see the relevant papers enclosed.

Yours sincerely,
Igor Makarov, ID310295142
Independent Researcher, PhD
