To the Nobel Prize Committee

Dear Chair and Members of the Committee:

RE: my research in physics and its claim for the prize

As you know, modern science is the only sphere of knowledge that should show the right way to the future of civilization, the way to peace, prosperity and justice. However, at present modern science has been undergoing a deep crisis, being unable to organize itself and become a guide for civilization. As a result, civilization, lacking the true ideology of society, has lost its way and is now like a ship sailing without captain at high sea. No wonder that civilization has been approaching a global catastrophe - now the only logical end of its long chaotic travel.

At the same time my decades-long independent research in Systems Theory and Theoretical Physics, owing to its radically new method rooted deeply in Hegel's philosophy, has yielded results of fundamental importance for modern science and humanities, paving the way to their radical reform and to the potential solution of all their cardinal problems.

However, with my status of independent researcher, with the present general ideological crisis and with the sometimes medieval charters of European universities, I have encountered insurmountable obstacles trying to get my above research recognized officially and thus win conditions to proceed with it.

In this connection, to grant civilization a chance for a new Renaissance, and perhaps for survival at all, in this critical period of its history, would you please take care, once more if necessary, to evaluate my research in physics:

subtitle being *Introduction to the Reform of Modern Physics*), concerning its claim for the 2021 Nobel Prize in Physics. Please, see online my above research in physics, its abstract and other relevant papers, their URLs enclosed.

Yours sincerely,

Igor S. Makarov, ID310295142

Independent Researcher, PhD Candidate

Address: 512/51 Hativat Carmeli, 32629 Haifa, Israel

P.O. Box 44436, 3144401 Haifa, Israel
