

2005 NASA NanoTech Briefs
Nano50 Award
2005 Product Award
Iomega Corporation
For
Subwavelength Optical Data Storage / AO-DVD
Inventor: Fred Charles Thomas III

Nanotech Briefs is pleased to announce the winners of the first annual Nano 50™ Awards, which recognize the top 50 technologies, products, and innovators that have significantly impacted – or are expected to impact – the state of the art in nanotechnology. The winners of the Nano 50 awards are the “best of the best” – the innovative people and designs that will move nanotechnology to key mainstream markets.

Nano 50 nominations were judged by a panel of nanotechnology experts. The technologies, products, and innovators receiving the 50 highest scores were named Nano 50 award winners.

Nanotech Briefs congratulates all of the Nano 50 winners. Join us as we celebrate these innovators, and the technologies and products they’ve created, at the Nano 50 Awards Dinner at Nano 2005, November 11-12, 2005, at the Boston Marriott Newton.
