

Significant Invention:

Interchangeable Cartridge Data Storage System for Devices Performing Diverse Functions

US Patents #: 5,809,520 & 6,587,304

Issue Dates: Sept. 15, 1998 & July 1, 2003

Inventors: Kim Edwards – Iomega Corp. President, George Krieger – VP R&D, Fred Thomas – Chief Technologist Adv. R&D, Brent Watson – Director Advanced R&D.

Iomega Products: *Clik!*, *Pocket Zip* and announced/forth coming *Digital Transfer Technology*

Distinguishing issued independent patent claim (extremely broad):

1. An interchangeable cartridge data storage system comprising:
 - a plurality of devices for generating signals representing different functions performed by different classes of said devices;
 - a mini-cartridge having a medium on which said signals are recorded; and
 - a mini drive in said devices for writing said signals and reading said signals from said medium so that diverse functions performed by said different classes of said devices can be interchangeably operated upon by said devices.

BIG-TIME STORAGE in the PALM of Your HAND!

Introducing the NEW Clik! Drive
Pocket-sized, lightweight, and a snap to use!

Three great bundles to choose from!

Clik! for Digital Cameras
Here's something new from Iomega—a storage drive designed to work with your digital camera. This 5-oz. handheld drive easily slips into your pocket and the matchbook sized 40MB Clik! disks store more than 25 floppies. So, go ahead, take tons of photos! With Clik! for Digital Cameras, you don't have to rush back to your PC when your camera reaches capacity. Just download from your flash memory to a Clik! disk on the go and keep right on shooting.

- ▶ Works with most CompactFlash- and SmartMedia-equipped digital cameras
- ▶ Allows you to create rolls and rolls of digital film
- ▶ Download pictures from your camera's memory quickly and easily
- ▶ Pocket-sized, rechargeable, lightweight design is ultra-portable (only 5 oz.)

Clik! for Mobile Computers
Work in the field, work on the plane. Whenever you go, Clik! is with you, ready to free up more space on your mobile unit's hard drive! Connect the PC card adapter cable to your Clik! drive, insert the PC Card into the card slot on your notebook or handheld PC, and with the click of a button, you can copy, transfer, or backup your important files onto a 40MB Clik! disk.

- ▶ For use with notebook computers and Windows CE devices
- ▶ Pocket-size, lightweight design
- ▶ Move your stuff from one mobile computer to another
- ▶ Tiny 40MB disks store more than 25 floppies!
