

I hereby command and politely beseech thee, Pentacle of the Moon; I desire you to carry out and do my bidding, specifically to have rain come about in my location- let the sky open and downpour come about. Let it rain like no other, and let all of this specifically happen or take place when I have activated you and for the time duration of the day (compared to night), specifically the moment of activation until 6 pm of that day. Cease any & all effects you bring about when I deactivate you. Amen.

JB (gx)
