

'Buck Rogers' Flight Stirs Conjecture

OTHERS CONFIRM SKY MYSTERY

rentation, rife, by Kenneth Arnold of Boise, Idaho, that he had
seen nine saucer-shaped shiny
objects dipping and skimming
through the sky between Mount
Rainier and Mount Adams in
Washington state at an estimated
1200 miles an hour, came these
observations today:
Byron Savage, Oklahoma City
businessman-pilot, said that five
or six weeks ago he observed
from his front lawn a flat disklike object hurtling through the
sky at tremendous speed. He said
be told his wife and a few pilot
friends, then said no more until
he heard of Arnold's report. "I
know that boy up there (Arnold)
really saw them," Savage reclared.

really saw them," Savage re-clared.

At Kansas City, W. I. Daven-port, a carpenter, said that yes-terday he, too, saw nine speeding objects, moving west high in the sky. They were going fast and he could not make out their shape, he said. However he reported en-

Conjectures multiplied today as widely separated areas reported apparent confirmation of incredibly fast disklike objects flashing through the sky—but skeptics remained.
Following yesterday's report at Pendleton, Ore., by Kenneth Arnold of Boise, Idaho, that he had seen nine saucer-shaped shiny objects dipping and skimming through the sky between Mount Rainier and Mount Adams in Washington state at an estimated 1200 willow the sky between Mount Rainier and Mount Adams in Washington state at an estimated 1200 willow the sky between Mount Rainier and Mount Adams in Washington state at an estimated 1200 willow to the sky between Mount Rainier and Mount Adams in Washington state at an estimated 1200 willow to day to day she had seen riplatter-like" light-reflecting objects. The first time was last week Tuesday or Wednesday and the second time at 10 a.m., Tuesday this week.

"I thought surely nothing could travel so fast." Mrs. Elma

time at 10 a.m., Tuesday this week.

"I thought surely nothing could travel so fast," Mrs. Elma Shingler said. Her observation that they wavered from side to side was similar to Arnold's report of dipping as though planes were changing place in a formation. She said they were moving northwesterly.

At Eugene, Ore., E. H. Sprinkle, said he nearly got a picture of them. A week ago Wednesday, he said, he took his \$3.50 camera to a local butte to test it. He spotted objects in the southwest, racing toward the northeast. But before he could click his shutter they were nearly out of sight. He said he had not told of seeing the objects—which he said were similar to those Arnold reported—because he thought no one would believe him. Enlargement prints from his

sky.
Dr. J. Hugh Pruett, University
of Oregon meteorologist, said that
whatever the objects were, they
were not of meteoric origin for
meteors do not dip or sway.

PENDLETON, Ore., June 25—
(UP)—Kenneth Arnold, a veteran pilot and fire control engineer, today clung stoutly to his story that he saw nine, shiny crescent-shaped planes or pilotless missiles fly in formation at a speed of at least 1200 miles per hour over Mt. Rainier plateau.

It's God's truth—I will swear it on a Bible. I saw them and I clocked them. They traveled 48 to 50 miles in one minute and 42 seconds."

(A plane traveling 48 miles in

seconds."

(A plane traveling 48 miles in one minute 42 seconds would be moving at a speed of 1,692 M.P.H.) Arnold said he saw the objects flying in "weaving formation" in a line at 10,000 feet as he piloted his own small private plane over Mineral, Wash. He said he flew at a right angle to the line of flashing objects. ing objects.

when he landed at Pendleton, en route to Boise, Idaho, Arnold told his story and stuck to it.

"Some of the pilots thought it over and said it was possible. Some of them guessed that I had seen some secret guided missiles. People began asking me if I thought they were missiles se en t over the North Pole. I don't know what they were. But I know this—I saw them."

Arnold, general manager and owner of the Great Western Fire (Continued on Page 3, Col. 2)
