

## Revives Theory Of Soviet 'Saucers'

WASHINGTON—(AP)—Rep. Ellsworth (Rep., Ore.) revived reports that last summer's "flying saucer" epidemic may have stemmed from Russian rocket experiments.

Claiming that he has received reliable information concerning the development of high velocity missiles by Soviet scientists, the Oregon lawmaker added in a statement:

"Strangely enough, this development might be the solution of the now almost forgotten mystery of the flying saucers."

He said the Russians are reported to have a rocket of amazing speed and "almost limitless range" propelled by a series of explosions occurring several seconds apart."
