Following information from Major S. Hemmarstrom, Swedish Air Officer on official 3 day visit Red Air Colonel-
 Finn Messgr. About 200 flying bombs have passed over
 Swedish territory, most entering from south and travelling
 generally north, some on zig zag course. Radar plotting
 indicates most bombs came from vicinity Posenmunde, some
 may have come from Soviet Baltic coastal areas. Only 1
 bomb plotted as curving toward west and entering Norway,
 all others curved towards east (D-2). Bombs are not V-1
 model, but are smaller and slightly longer (B-3). They
 are radio controlled and carry no war head, but are self
 destroying. Most travel at altitude of about 1,000 meters
 but have been seen as low as 5 meters. Velocity 400 to
 600 kilometers per hour. Generally have appeared to be
 under good control. Maximum plotted course over Sweden
 1000 kilometers, but Sweden have no plotting station in
 far north (D-2).

Source has heard no reports of bombs over Finland
 therefore believes bombs have fallen into Bothnia Gulf.
 Additional information from same source: Soviets are
 carrying on extensive work in Rumanian area which includes
 some kind launching project (B-4). Wide spread aerial
 seeding by Soviets of Rold Peninsula (B-2), where wind

Re: MAX 50693

19 August 1946

activities are being developed possibly Uranium (E-4).
Soviets restored and are operating German experimental
underground works in Iteva Mountains, vicinity Kordhausen
(E-4).

R/A comment: Most launching believed from Feenemunde.
While experimentation probably basic reason, silence of
Soviet press and continuance bombs over Sweden after world
publicity suggests additional purpose possibly furthering
nerve warfare.

End.

Note: Has been relayed.
