How to Grow A LOT of Food in A LITTLE Space

Just because you don't have a plot of land doesn't mean you can't grow your own food. It just means you need to get vertical!

Tower Garden® represents the next generation of urban farming. This highly efficient aeroponic growing system allows you to grow MASSIVE AMOUNTS of produce in a TINY AMOUNT of space — in about HALF THE TIME of traditional soil-based agriculture, using just A FRACTION of the water and space!

HEY URBAN FARMER!

It doesn't get more local than your own back yard. (Or, shall we say, your own patio, rooftop, terrace, balcony, deck, or porch?) Tower Garden® makes it simple to grow your own fresh, nutritious produce — even if your outdoor space is limited.

TOWER GARDEN® IS:

- **EFFICIENT:** Grows 20 plants in just 2.5 feet by 2.5 feet of space
- **ECO-FRIENDLY:** Uses one tenth the water and land required by traditional growing and virtually eliminates the need to ship and store produce
- **EASY:** Easy to assemble, and there's no weeding, tilling, or kneeling
- **COST-EFFECTIVE:** Lasts a lifetime and easily pays for itself — typically in about 2 years
- **SAFE:** Made from USDA-approved, UV-stabilized, food-grade plastic

Eat local, from Tower to table!
