## **Bailey is a 90 lb. Labrador Retriever**

The Basic principle is that cancer (and most other disease) thrives on simple sugars. The healthy body is strengthened by a contaminant-free well-rounded, low carbohydrate and slightly alkaline diet. You can learn more about this at: [www.beatcancer.org](http://www.beatcancer.org)

### **Bailey's Anti-Cancer Diet**

Bailey's stew was:

- 1/2 cup of organic dry lentils, boil & simmer in purified water
- 1 T. Olive Oil
- 1 lb - Wild-caught Salmon or Tuna or Grass-fed organic beef.
- Handful of organic fresh spinach
- 1 can Organic peas (canned or frozen)
- Raw Organic broccoli - 2 stalks
- Raw Organic cauliflower - 3/4 cup
- Raw Organic green beans - 1 cup
- Raw Organic zucchini - 1 small
- 1 raw organic carrot or 1/2 raw organic sweet potato
- 1/4 small head of raw organic cabbage chopped
- 1 organic beet

Once the lentils are soft, add olive oil and season with

- 1 t. powdered cinnamon,
- 1 t. garlic,
- 1 T. turmeric,
- A very light shake of red pepper or cayenne,
- 1 T. Dried parsley.

Add Meat/Salmon/Tuna.

Add the sweet potato or carrot and simmer, adding the other veggies broccoli first — cabbage and spinach last.

You want the veggies chewable but as close to steamed/raw as possible.

Spoon the mixture into a glass storage container and add just about 6 blueberries and sprinkle raw organic ground flaxseed on top. Cover tightly and Store in refrigerator.

Upon each serving, put about 1/4 cup of purified or spring water in feeding bowl, open and pour in powder from Orchard and Garden blend Juice Plus+ capsules (My 90lb. dog gets the adult dose of two of each Red and Green color per day - adjust dose to weight of dog). Dilute the juice powders in the water and add the appropriate feeding portion of the stew, mix and serve to your pup. [I did not give Bailey the Vineyard Blend due to the Concord Grape ingredient, which is harmful to Dogs and Cats]

Bailey was given an anti-inflammatory and antibiotic the vet said had anti-cancer properties that he also took as prescribed. Piroxicam 10 mg 1/day and Baytril 136 mg 2/once a day.

Bailey was diagnosed with inoperable prostate cancer 4/27/16 and diagnosed cancer-free 7/15/16. I continued with the homemade dog food for about 4 more months then introduced 1/2 & 1/2 Canadæ "Pure" Wild Salmon dog food, and continue with the adult dose of the Orchard and Garden blend capsules.

He is doing FANTASTIC with all the energy of a 3 yr old dog. He will be 10 years old October of this year.

I do not make any claims or promises this diet will cure your dog, I only believe it helped starve the cancer, empower and strengthen the healthy cells, reduce inflammation and end the cancer cycle in my dog.

My best wishes and prayers for your dog's healing and long, happy life!

Notes:

Once Bailey was declared cancer-free, we took him off the prescriptions per the blessings of his oncologist.

I used Pyrex storage containers as I was afraid of plastic contamination and I made his stew in a stainless-steel cooking pot

I also gave him 1 krill oil capsule per day until I introduced the Canadæ Pure Salmon dog food which contains omegas.

Best Wishes ~ Lynn B.
