Juice PLUS+®

Juice Plus+® Omega Blend
Plant-based omega supplement

Filling the Gaps

Everyone knows there's the way we should eat—and the way we do eat.

That's why Juice Plus+® offers a variety of nutritional products that add plant-based, whole food nutrition to your diet. The next best thing to fruits and vegetables, Juice Plus+® Orchard, Garden, and Vineyard Blends help fill the gaps in your diet. These foundational products provide whole food nutrition from the dried juice powders of 30 different fruits, vegetables, and grains in convenient capsule form.

Just as most people don't consume enough fruits and vegetables daily, they're also lacking in omega-3 fatty acids. According to a recent study, 90 percent of Americans do not get enough omega-3s through their diet. That's a problem, because omega-3s are as important to your health as fruits and veggies! In fact, there is a large and growing body of scientific evidence that says a diet rich in omega fatty acids supports a broad array of health benefits — especially for the heart, brain, joints, skin, and eyes.*

Our First New Capsule Product in 15 Years!

As part of our mission to inspire healthy living around the world, we are pleased to introduce our newest Juice Plus+® capsule blend: Juice Plus+® Omega Blend.

Juice Plus+® Omega Blend takes omega supplements to a whole new, whole food level. Our omega product is a balanced blend of omega fatty acids — not just omega 3, but also omega 5, 6, 7 and 9. Our omegas are not extracted from fish sources, as are the omegas in most other supplements. We bypass fish oil entirely, replacing it with a naturally balanced, 100% plant-based blend of multiple omegas, all in a convenient capsule form. As a daily nutritional product, Juice Plus+® Omega Blend complements our Orchard, Garden, and Vineyard blends.

Juice Plus+® Omega Blend Plant-based omega supplement

What makes Juice Plus+® Omega Blend unique?

- Plant-based, whole food nutrition: True to our commitment to plant-based nutrition, we blend oils from six different whole food plant sources: algae, pomegranate seeds, sea buckthorn berries, raspberry seeds, tomato seeds, and safflower seeds.
- Pure and sustainable: Fish are rich in omega-3s because they eat algae that is rich in omega-3s. We cut out the middle fish by extracting our omega 3s from the original algal source, not from the fish. This provides us a purer, more sustainable source of omega 3s.
- Full spectrum omegas: While most omega products provide only omega-3, Juice Plus+® Omega Blend provides omega 3, 5, 6, 7, and 9 fatty acids, balanced as they actually occur in nature.
- Cold-pressed: We cold press our plant-derived oils to preserve their nutritional quality and integrity.
- Vegetarian capsules: We encapsulate Juice Plus+® Omega Blend in a vegetarian capsule made from tapioca using a new, state-of-the-art process that protects against degradation.
