## **Warmbox Top Features**

Warmbox is the #1 email warm-up solution that offers some outstanding features. Let's take a detailed look at each feature one by one.

### **1. Easy Plug & play setup**

Easy to set up the entire email warmup process. No technical skill is required, anybody can set up Warmbox without any prior knowledge. Also, there's a vast

knowledgebase library available anytime to help you run your email warmup process smoothly.

## **2. Multiple warm-up options**

Warmbox offers several email warm-up options, currently providing four choices: Grow, Flat, Random, and Custom. You can select the one that suits your specific needs. If the domain is new you can use the Grow option to warm up email gradually.

If you have an old domain and already sent many campaigns. Then you can select the Flat warmup option so you can control email sending with your own space. These email warm-up choices speed up the process and ensure your emails are prepared for large-scale campaigns.

## **3. Realistic email templates**

Warmbox uses a realistic email template for sending emails to their network. This helps to build credibility for your domain and get the highest engagement for your campaign. There are millions of naturally created email templates used in Warmbox to increase the sender reputation.

## **4. Best and safest email warmup solution**

Warmbox operates around the clock, without any specific timing or work hours. It runs continuously, boosting your sender reputation for both your domain and IP address. It's a secure and reliable platform for email warm-up that you can trust.

## **5. Free IPs/Domain Blacklist & DNS deliverability checker**

In Warmbox you will get a free IPs/Domain blacklisting checker. And also you can review DNS records to safeguard against spoofing and malicious activities. This is the top feature that you can effectively utilize for your email campaign.

## **6. Humans realistic (GPT4 & Hybrid)**

Warmbox.ai uses GPT-4 technology to send genuine emails. It retrieves emails from spam folders, opens and bookmarks them, responds to some emails, and creates positive interactions to boost your email-sending reputation.

## **7. Automated interactions**

Warmbox is a fully automated warm-up platform, Starting from removing emails from spam folders, opening emails, replying to emails, and marking them as important or favorite all interactions can be done automatically. Also, you will be able to interact with a 35,000 inbox network that constantly helps you improve email deliverability. You have the flexibility to customize interactions according to your preferences.

## **8. Spam score monitoring**

Warmbox offers spam score monitoring to assist you in monitoring and enhancing your email performance. With this feature, you can keep an eye on your spam score and make necessary changes to your email content and tactics to avoid landing in spam folders.

## **9. Inbox integrations**

Warmbox offers a wide range of email client integrations, making it easy to connect with your preferred email provider. Some of the supported providers include Gmail, Gsuite, AOL, Yahoo, Outlook, iCloud, Zoho, SendGrid, Sendinblue, Brevo, Amazon SES, SMTP, Yandex, Mailgun, and many more.

## **10. Reporting & Dashboard**

Analyses and understand each and every email activity. Once your email is prepared for the campaign, Warmbox will notify you and provide a deliverability score for each test you conduct. A score between 80-100 indicates it's ready for the campaign, while a score below 30 is considered spam and most of your emails will go to spam.

Warmbox offers various reports, including Domain/IP Blacklisting, SpamAssassin Score, DNS report, Delivery report, Inbox placement insights, warm-up activity report, and more. These reports are valuable tools to increase email deliverability.

## **Warmbox Pricing Plans Reviews**

Warmbox offers a reasonable pricing structure based on the number of users and daily email volume you require.

1. Their basic plan starts at \$15 per month, allowing you to warm up one inbox and send up to 50 emails per day. This plan is ideal for solo entrepreneurs, startups, and individual business owners.
2. For larger teams, the Growth plan is available at \$139 per month for an annual subscription, offering 6 inboxes and a daily email limit of 500.
3. If you opt for a monthly subscription, the costs will differ. For \$15 plan will cost you \$19 and the \$139 plan cost you \$159 per month.
