REVISED HEALTH EMERGENCY ALERT REPORT

COVID “Vaccines” and the health of your friends & family members

Dear friend,

I wrote the first version of this report mid-August 2021. The whole purpose was to provide information on the COVID “vaccine” that has been censored for the last 2 years. I have since then updated it almost on a daily basis. The growing scientific evidence has been staggering on the following points:

1. COVID-19 can be effectively treated (especially in the early stages) with supplements and generic, proven drugs such as ivermectin, hydroxy chloroquine, monoclonal antibody therapy, etc.
2. The “vaccines” do not deserve such denomination. Rather, they are experimental inoculations which have NOT passed the longtime proven clinical tests and, as of today, are NOT FDA approved.
3. “Vaccinated” people are in higher risk of further COVID infection than unvaccinated people and can transmit COVID via the “shedding” of the so-called spike proteins. Boosters will worsen the scene.
4. Statistics on COVID mortality rates in the US and in the world have been manipulated upward and mortality due to COVID “vaccination” have been plainly falsified and manipulated downward.
5. Mass media has continuously lied, with the help of big Tech censorship and corrupted authorities.

If people cannot have access to ALL data because of censorship, they will be unable to make a fully responsible, informed consent-based decision about the “vaccines.” Please note that I am NOT an “anti-vaxxer” as the mass media like to call anyone who dares question the current political strategy on the subject. I am (a) pro-human rights and (b) pro-constitution. I am also against manipulation and lies – especially when they can lead to the harm and even death of hundreds of thousands of people.

Content of report:

1. Statistics & reports on fatality/survival rates from COVID
2. Interviews with REAL authorities
3. International lawsuits & Class Actions
4. Is the vaccine spreading the virus?
5. Why effective treatments are suppressed & protocol against COVID and against the “vaccines.”
6. Final considerations by Dr. Ryan Cole.

Yours truly,

Patrick Valtin

- Explanation of HOW Hydroxy chloroquine works: [click here.](#)
- I found online a recipe for hydroxy chloroquine, very simple and really effective. See [this link.](#) You take the peel of 3 organic grapefruits, peel of 2 or 3 lemons depending on size, you add 9 cups of water and put it all in a pot (glass or stainless steel) but with either one, the top has to be glass. Let it simmer for 3 hours and let it sit for another 2 to 3 hours, remove the peels and put in glass containers. Keep on in the fridge and the rest in freezer.

You can use it as a prevention and in that case, you can take 2 to 4 tablespoons twice a day (or more). If you have covid, take 4 to 6 tablespoon every hour the first day and until you feel the difference and go down to every 2 hours and change as needed. So far, several people got rid of covid with this but it will also protect you from vaccinated people who are the most contagious.

- Coronavirus infections are seasonal.
- Face mask wearing outdoors is absolute insanity. No study shows any super-spreader event outdoors. The best mask of all is your immune system.
- There is no such thing as cold and flu season. There is only low vitamin D season.
- Inflammatory (cytokine) storm cannot be controlled without adequate vitamin D levels. Massive numbers of Americans have low vitamin D levels.
- 96% of ICU patients are vitamin D deficient
- You cannot synthesize vitamin D from sunlight during fall and winter at 35-degrees north.
- You live in northern climate? You are immune suppressed if you do not supplement with vitamin D during fall and winter.
- Scandinavian countries (Finland, Norway, Sweden) test their citizens twice a year for vitamin D and fortify 35 foods with vitamin D.
- Our population is left vulnerable to any seasonal viral infection without a public health program to promote vitamin D adequacy.
- There is not social disparity of care but the fact darker skin pigmentation inhibits sunshine vitamin D synthesis in the skin.
- Fauci says he personally takes 8000-9000 units of vitamin D per day but why has this not become a public health message?
- The top three public health messages should be: 1- vitamin D; 2- vitamin D; 3- vitamin D.
- By law, the federal government cannot approve a vaccine if there is a proven treatment. That would be Ivermectin.
- The government is in bed with a vaccine company; both the federal government and Moderna co-hold patents on their RNA vaccine. The “fox is guarding the henhouse.”
- The drug Remdesivir only works during the first 2-3 days of the infection. It does not increase survival. It is like “peeing on a forest fire.”
- Four billion doses of Ivermectin have been safely given to patients. Death rate decreased 70-90% in hospitals treating COVID-19 patients.
- Of the half million COVID-19 deaths in North America, there would be 375,000 less deaths if Ivermectin were used! Public health officials have blood on their hands. 100% of Ivermectin-treated patients don’t get ill. Works for all genetic variants.
- The vaccines are an experiment on society.
- The vaccine is unproven and long-term safety data is not even being known.
- You can get Ivermectin from doctors online. Myfreedoctor.com.
