

## DID YOU KNOW?

The ILP is a tool that transfers information from Banner to Canvas.

The ILP synchronizes:

- users
- courses
- student enrollments
- faculty assignments
- cross-listing
- academic terms
- grade data

## Purpose of the ILP Newsletter

The Ellucian Intelligent Learning Platform (ILP) was implemented in January 2021 to connect Banner and Canvas. **As a result, there are significant changes that affect the way information is handled.** As we learn how the information flows between these two systems, we will send out the ILP Newsletter to inform the College community of necessary procedural changes.

## Verifying Rosters

There have been instances in which the ILP does not immediately process changes that were made in Banner. While we are in constant communication with Ellucian for updates, it is imperative for faculty to verify Banner/PASPort to make sure the information matches with Canvas.

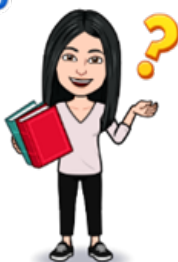

Please verify that your Canvas course reflects the same student enrollments from your PASPort roster. It is important that student registration data is accurate; therefore, it is highly recommended to review these lists regularly to ensure that all changes in Banner/PASPort are reflected immediately in Canvas.

Please report any discrepancies to the eLearning Center as soon as possible via the contact methods below.

## Browsers for Submitting Grades to Banner

When using the Submit Grades to Banner tool, the recommended browsers to use are Google Chrome, Mozilla Firefox, and Microsoft Edge. The Submit Grades to Banner tool does NOT function properly with Apple Safari Browser.

Any Questions?

Contact eLearning **BEFORE** making any changes in Banner
