The rapid adoption of cloud-based solutions and the growing need to automate the operational processes to drive the [global healthcare interoperability solutions market](). Moreover, increasing investment in healthcare interoperability initiatives by the governments, increased awareness among enterprises about the benefits of cloud-based software are other factors driving the growth of the market. The business continuity requirements are creating a high demand for cloud storage, disaster recovery, and backup services for the records of the patient's clinical history. To encounter the security needs of enterprise data, cloud-based storage provides security controls to ensure that all the data is stored securely in data center facilities and is available for quick access.

**A full Report of Global Healthcare Interoperability Solutions Market is Available at:** [https://www.omrglobal.com/industry-reports/healthcare-interoperability-solutions-market-size](https://www.omrglobal.com/industry-reports/healthcare-interoperability-solutions-market-size)

The data interoperability solutions are largely employed in different healthcare institutions, for instance, in March 2019, the University of Pittsburgh Medical Center (UPMC) is investing in a cloud-based healthcare operating system to enhance healthcare interoperability and break down data silos. This system is designed to make it safe and easy for app developers to make software solutions that access clinical systems and clinical data. Data interoperability requires sharing clinical information across the network, care providers and systems.

The cloud computing environment offers various advantages to stakeholders in the healthcare ecosystem such as patients, providers, and payers. Lack of data interoperability solutions has been a restraint in the exchange of healthcare data in various stakeholders. Cloud Health Information Systems Technology Architecture (CGISTAR) which achieves semantic interoperability through the use of generic design methodology that uses a reference model that defines the set of data structure and archetype model defines the clinical data. CHISTAR is an application component that is structured using the cloud component model that consists of loosely coupled components.

Big data and interoperability in healthcare is the reality for many healthcare providers. Big data leads to an increase of information in the healthcare industry. The collection of data from many health information sources contribute to the growth of the data. The various benefits of interoperability and big data for patients such as easy access to patient records, informed decision for treatment, reduced healthcare costs, fewer medical errors and integration of health-related records.

**Global Healthcare Interoperability Solutions Market- Segmentation**

**By Level**

- Structural
- Foundational

- Semantic

**By Deployment Type**

- Cloud-Based
- On-Premises

**By End-Users**

- Hospitals and Diagnostic Centers
- Ambulatory Surgical Centers

**Global Healthcare Interoperability Solutions Market – Segment by Region**

**North America**

- The US
- Canada

**Europe**

- Germany
- UK
- France
- Spain
- Italy
- Rest of Europe

**Asia-Pacific**

- China
- Japan
- India
- Rest of Asia-Pacific

**Rest of the World**

- Latin America
- Middle East Africa

**Company Profiles**

- AllscriptsHealthcare, LLC
- Cerner Corp.
- Ciox Health
- Edifecs, Inc.
- Epic System Corp.
- Experian Information Solutions, Inc.
- Google, LLC
- IBM Corp.
- Infor, Inc.
- iNTERFACEWARE, Inc.
- InterSystems Corp.
- Jitterbit, Inc.
- Koninklijke Philips N.V.
- NXGNManagement, LLC
- Optum,Inc.
- Oracle Corp.
- Orion HealthGroup, Ltd.
- OSP Labs
- Qventus, Inc.
- Redox, Inc.
- Smith Medical, Inc. (A Division of Business Smiths Group PLC)
- ViSolve, Inc.
