

Need some items packed and shipped?

Maybe you have some delicate china that you need to ship long distance, but you want to make sure the set is prepped and packed properly? Or maybe you have a high value antique that you need to get cross country, and you want to make sure it arrives safely? Or, perhaps, you have some expensive electronics and equipment you need to get packed, shipped and delivered and you're working with a tight deadline? Whatever the need you can be sure that Ship Smart can help.

We have more than 20 years of experience packing and shipping high value antiques, electronics, fragile and delicate items – even awkward and oddly shaped pieces are no problem for us! No matter how complex or unique the piece or pieces, we can handle it and with the care and consideration it deserves.

Our Delivery Services

We can offer full service, white glove delivery in which all the items are unpacked, brought inside and placed. Or, for those looking to save a little, we can offer curbside delivery instead; simply dropping the shipment off at your residence by appointment.

We ship to any city or state and almost every country!

We can ship to any town, city or state in the US, and we can even [ship and pack](#) internationally. Thanks to our expansive network shipping facilities, no location is beyond our reach.

Our Packing and/or Crating Services

Once the items are back at the warehouse, our standard [packing and shipping](#) protocol is to bubble-wrap and cardboard-box the furniture items. Then, everything gets safely banded and secured to shipping pallets.

The crating procedure varies depending on the complexity and nature of the piece, of course, but some of our options include:

- Full wood, Styrofoam lined crates for items (antique furniture and artwork).
- Insulated sectional crates for electronics (high value servers).
- A-frame, lined crates for upright pieces (fragile mirrors and framed paintings)
- Suspended crates for items that can be damaged by their own weight (chandeliers).
- Skeleton crates for larger/heavier pieces that just need that little bit extra.

Our Shipping Options

We ship via consolidation, so your cost is based on what you're shipping which is how we can offer such competitive pricing. Our standard transit times can vary depending on where you are shipping from and to, the time of year, as well as weather conditions. On average, these tend to run about two-four weeks, but you can always track your order at any point by simply contacting our customer service. And if you are under a time constraint, we can provide expedited services and offer guaranteed delivery dates and time frames.

Our Delivery Services
