

Morongo Band of Mission Indians– Operational Phase 2a - Activation Support Concept

Priorities:

- Stabilize the incident while ensuring life, safety, and managing resources efficiently and cost effectively
- Protect property including Tribal government enterprises, Cultural and religious Resources
- Reunify a full Tribal Council

Objectives:

- Activate Morongo Emergency Operations Plan, annexes, and ESF's following the catastrophic incident and decide on operational periods
- Develop the EOC's action plan and the IAP
- Upon activation of the Emergency Operations Center and/or supporting ESF(s), have the qualified personnel and information system in place to inform the Tribe, Tribal Government staff, and people on the reservation

Assumptions Based on Planning Factors:

- Loss of power
- Limited communications
- Transportation/inaccessible
- Lack of personnel
- Local and regional capabilities inundated
- Critical resources compromised

Assumptions change to facts each operational period

Tier One Capabilities(E + 24):

- Activate Public Communications FM radio system, one call now notifications, disaster net radio
- Windshield survey/damage assessment
- First responder prep for long term capabilities
- Council motions in place to run incident through the EOC Manager if no council/policy group is present

Gaps:

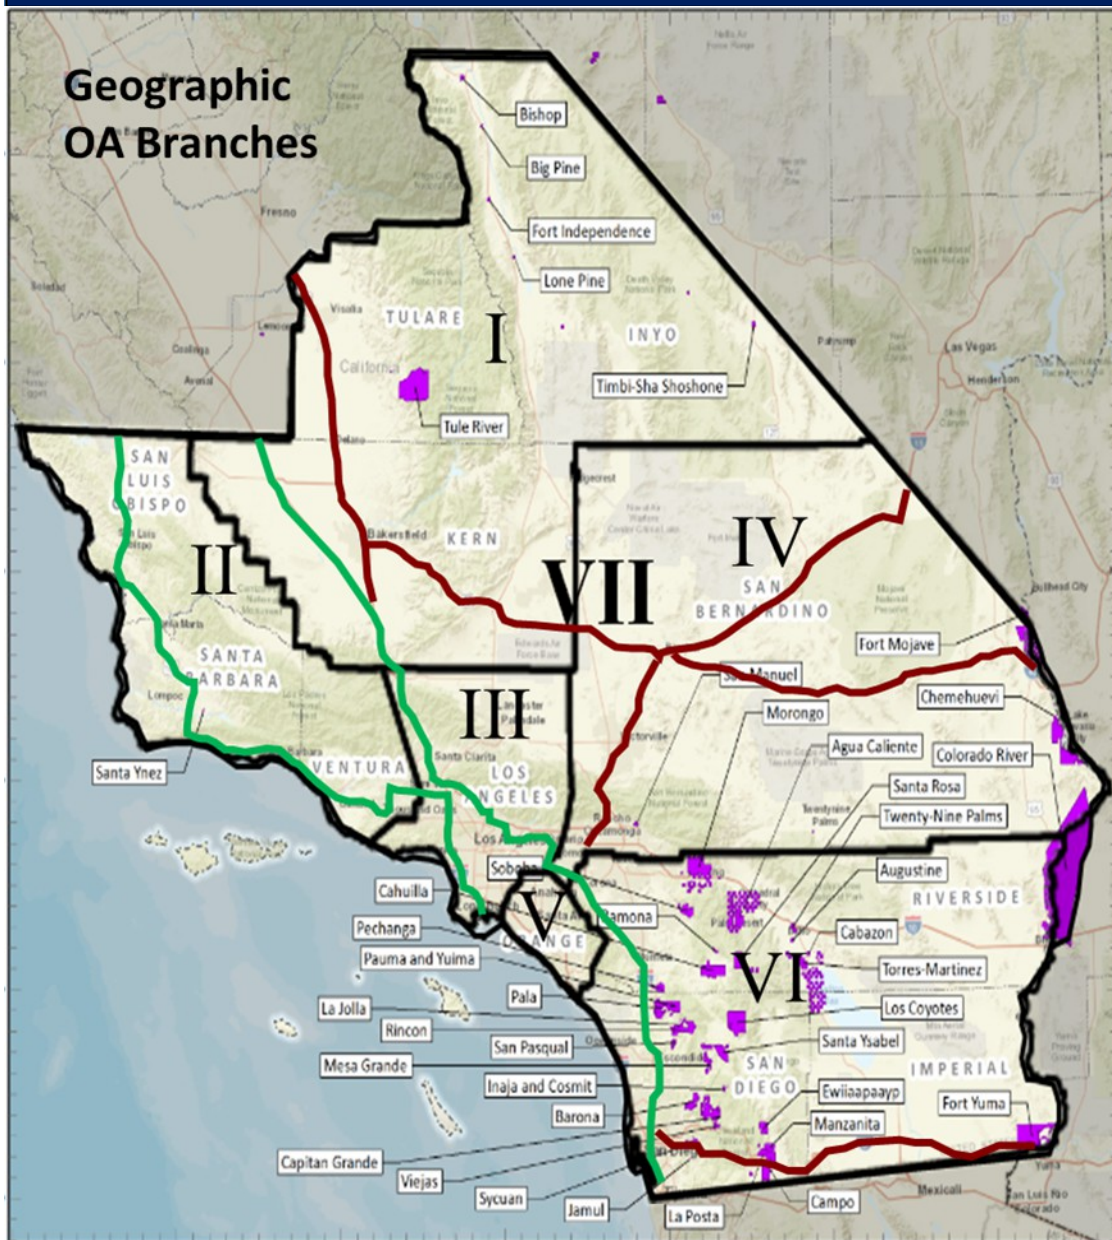

- No IPAWS, WEA capabilities
- Insufficient local Mutual Aid
- Transient sheltering
- Critical infrastructure restoration

Constraints / Concerns:

- Government/Business Operations
- Search & Rescue
- Personnel/staff availability
- Access to Reservation
- Hazmat

Tribal Operational Planning Map

Morongo Band Of Mission Indians – Operational Phase 2b – Deployment/Employment Support Concept

Priorities:

- Stabilize the incident while ensuring life, safety, and managing resources efficiently and cost effectively
- Protect property including Tribal government enterprises Protect cultural and religious Resources
- Mass search & Rescue
- Sustain & support shelter operations
- Find solutions for Unmet needs
- Establish IHS clinic for public health if staff is available

Tier One Capabilities(12-72):

- Deploy on hand sheltering capabilities
- Deploy FEMA FDR trailers
- MCI trailer
- Mobile EOC
- Shower trailers
- Tribal MOU's

Objectives: continue objectives from 2a

- Support mass search & rescue operations
- Resource and staffing to sustain shelter support
- Disaster declaration
- Critical infrastructure inspections
- Asses long term resource capabilities
- Daily mission task request to State and FEMA

Gaps:

- Sheltering for transient population
- Building/engineering inspectors
- Essential life sustaining resources
- Reservation access
- IHS medical staff obligated to city/county and all rights turned over to respective county

Assumptions Based on Planning Factors:

- Lack of communications
- AFN concerns
- Water sanitation
- Road passage
-

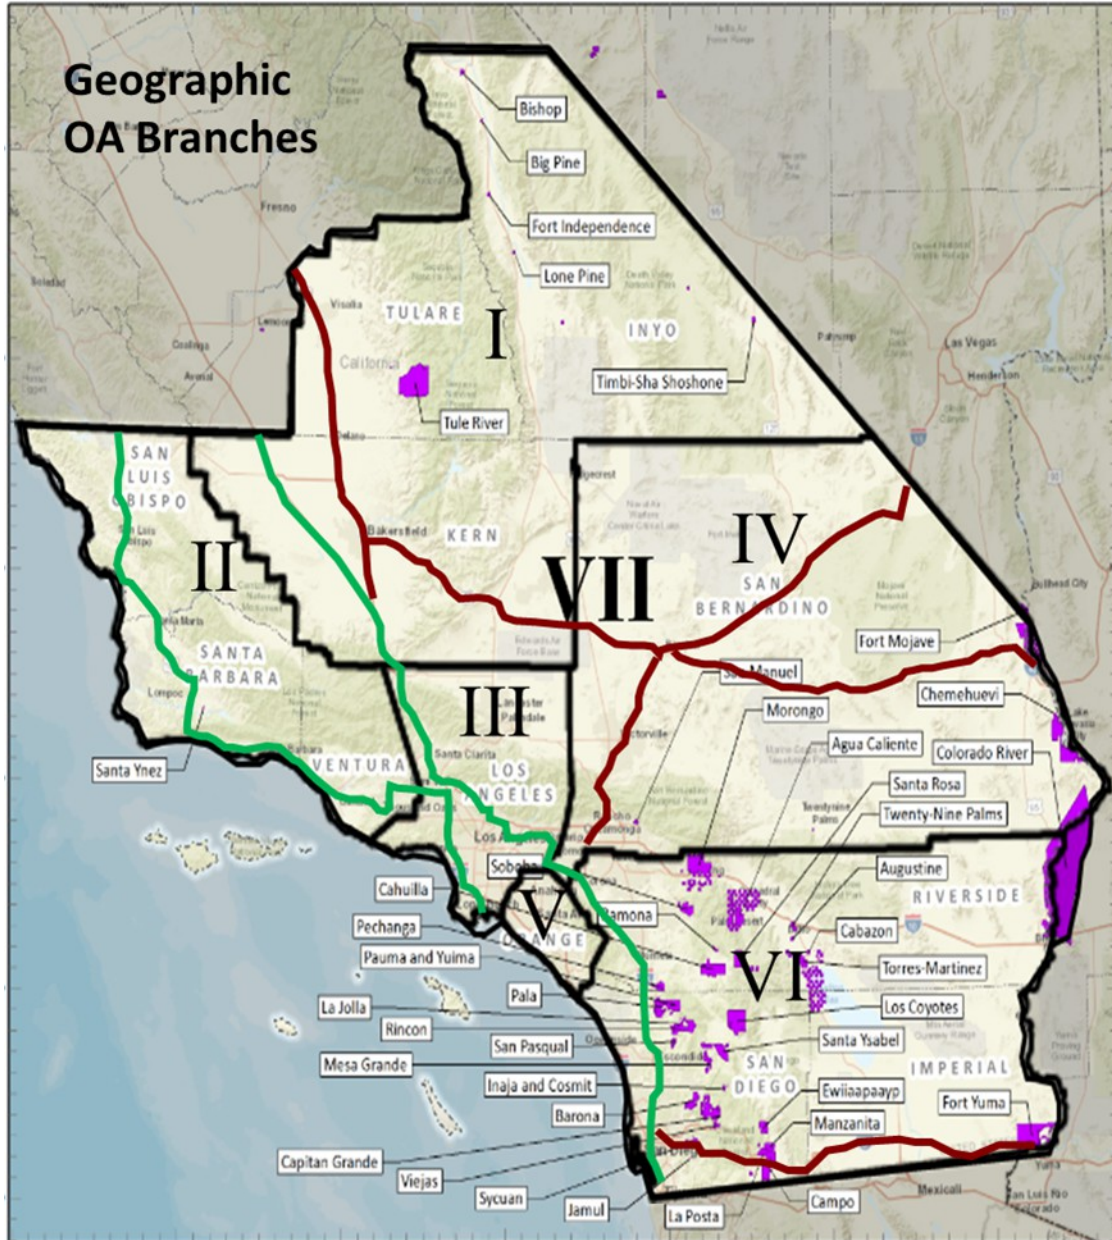

Constraints / Concerns:

- FEMA/State assistance
- CNG/Propane transportation resources
- Tribal Enterprise patrons stranded on Tribal estates
- No MOU's with the State or the County

Assumptions change to facts each operational period

Tribal Operational Planning Map

Morongo Band of Mission Indians– Operational Phase 2c – Sustained Response Support Concept

Priorities:

- Road clearance & restoration
- Restoration and repair of critical lifelines
- Debris removal
- Short term & long term housing & schools
- Identify unmet needs of community
- Public health
- protect property including Tribal government enterprises, Cultural and religious Resources

Tier One Capabilities(72 + hours):

- Measurable decreases in long-term vulnerability
- Risk assessment and risk management of critical infrastructure
- Whole community planning

Objectives:

- IA/PA needs
- Tribal businesses and enterprise recovery
- Temporary and permanent housing
- Water, utilities, and transportation sustainment
- Continuously identify, analyze, and maintain facility risk assessments for critical infrastructure
- Law enforcement

Gaps:

- Access to additional resources
- Power & Fuel
- Life sustaining resources
- Personnel
- Long term housing
- Inability to run Tribal businesses and enterprise recovery

Assumptions Based on Planning Factors:

- Casino collapse with potential of thousands trapped
- House/building fires on reservation with potential of spread to wildland
- Hazmat from train derailment

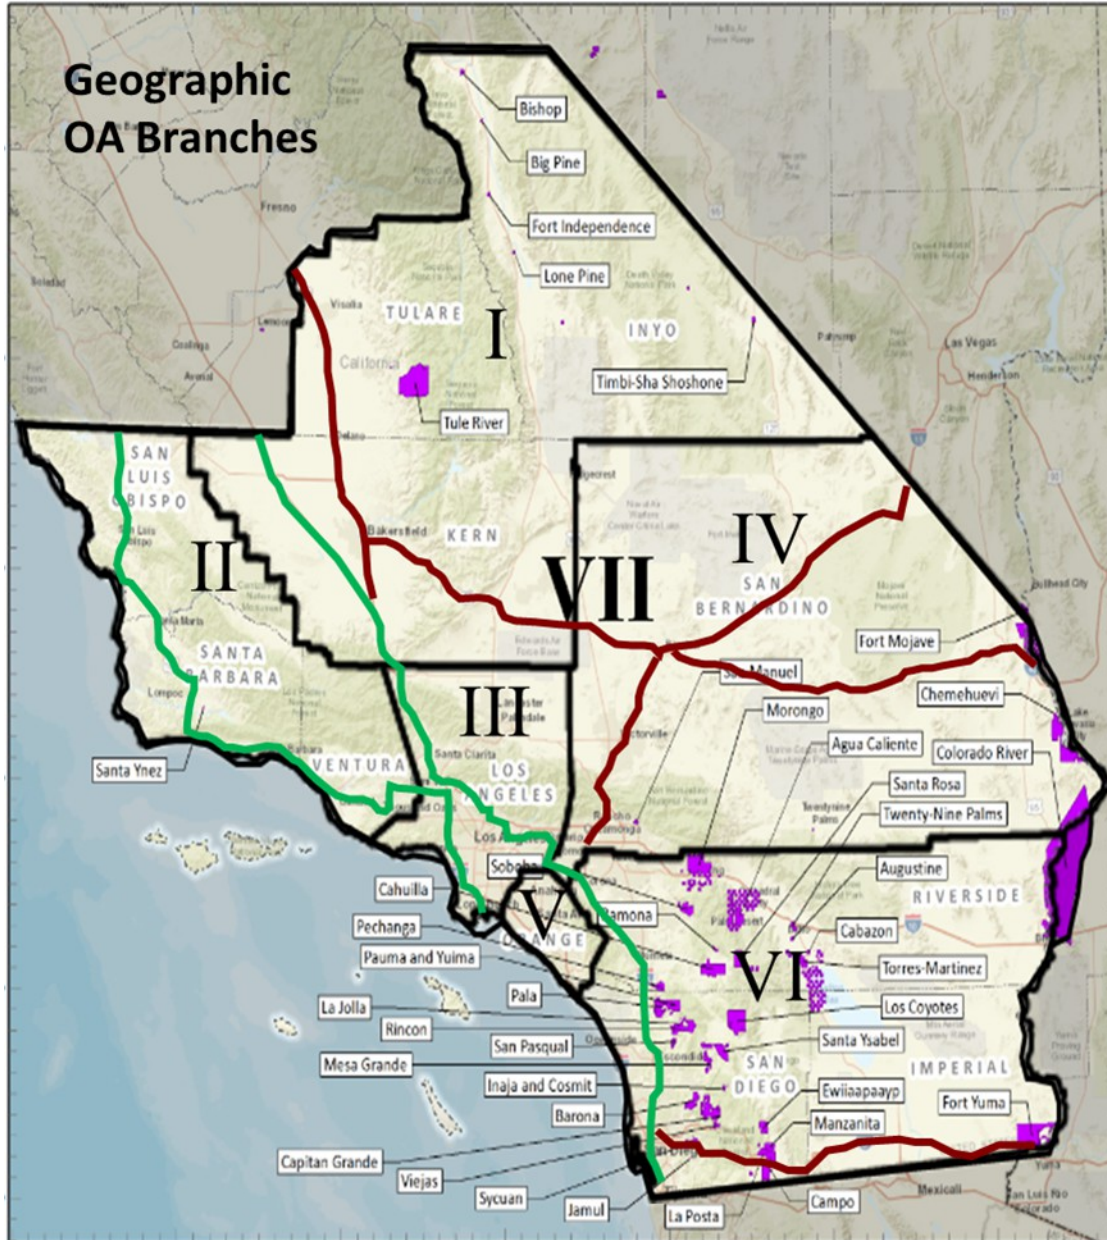

Constraints / Concerns:

- CPODS lack thereof
- Critical infrastructure restoration capabilities
- Fatality management

Assumptions change to facts each operational period

Tribal Operational Planning Map

Morongo Band of Mission Indians– Operational Phase 3- Recovery Support Concept

Priorities:

- Permanent restoration of infrastructure, housing, and local economy
- Implement long term recovery strategy
- Damage assessment
- Public and Environmental health
- protect property including Tribal government enterprises, Cultural and religious Resources

Tier One Capabilities():

- Utilize public works equipment
- Jurisdictional outreach/MOU's
-
-
-

Objectives:

- Enterprise restoration
- Repair of critical facilities
- Completion of debris removal & transportation route restoration
- Hazard mitigation projects

Gaps:

- Lack of materials/resources
- Interstate 10 access

Assumptions Based on Planning Factors:

- Resource consumption
- Local jurisdiction assistance/collaboration

Constraints / Concerns:

- Reservation access
- Debris disposal
- Effects of Tribal Enterprises

Assumptions change to facts each operational period
